Appendix A: Vehicle Eligibility List (catalog)

Appendix B: Vehicle Eligibility Applications

Appendix C: Vehicles under Common Ownership or Control

Appendix D: Voucher Request Form

Appendix E: Voucher Redemption Form

Appendix F: Innovative Small E-Fleets – To be published separately from this document, at www.californiahvip.org/im

Appendix G: Public School Bus Set Aside -- To be published separately from this document, at www.californiahvip.org/im

Appendix H: Public Transit Set-Aside – To be published separately from this document, at www.californiahvip.org/im

Some policies and requirements in Appendices F-H related to Innovative Small E-Fleets, Public School Bus, and Public Transit Set Asides differ from the policies and requirements in the remainder of this Implementation Manual. Where the policies and requirements in the appendices differ, the appendices take precedence. Otherwise, this standard Implementation Manual takes precedence. Also, the Terms and Conditions, Request Form, and Redemption Form included Appendices D-E, and other appendices content, do not apply to programs covered in Appendices F-G. Separate documents will be required for these two set-asides.

A. INTRODUCTION AND REGULATORY CONTEXT

The Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP) accelerates the deployment of zero-emission and plug-in hybrid trucks and buses, and trucks equipped with electric power take off (ePTO) systems, in California. HVIP benefits the residents of California by stimulating deployment of advanced clean commercial vehicles, improving community health with immediate air pollution emission reductions, as well as reducing greenhouse gas emissions to help meet State climate goals, and yielding substantial economic benefits. It is implemented through a partnership between the California Air Resources Board (CARB) and a Grantee, selected via a competitive CARB grant solicitation. HVIP provides vouchers on a first-come, first-served basis in most cases. In addition, HVIP provides increased incentives for small fleets¹ domiciled in disadvantaged communities and meeting other requirements.

There are several key pieces of legislation that provide the overall policy framework and funding to support HVIP. In 2007, Governor Schwarzenegger signed into law the *California Alternative and Renewable Fuel, Vehicle Technology, Clean Air, and Carbon Reduction Act of 2007*. Assembly Bill (AB) 118 (AB 118, Statutes of 2007, Chapter 750) created the Air Quality Improvement Program (AQIP), a voluntary incentive program implemented by the California Air Resources Board (CARB), to fund clean vehicle and equipment projects, air quality research, and workforce training.

As required in Health and Safety Code (HSC) Section 44274(a), the Board adopted implementation guidelines in 2009 for AQIP. The Guidelines for the AB 118 Air Quality Improvement Program (Guidelines) define the overall administrative requirements, policies, and procedures for program implementation based on the framework established in statute.

In 2012, the legislature passed, and Governor Brown signed into law, three bills – AB 1532 (Pérez, Chapter 807), SB 535 (de León, Chapter 830), and SB 1018 (Budget and Fiscal Review Committee, Chapter 39s) – that established the Greenhouse Gas Reduction Fund (GGRF) to receive Cap-and-Trade auction proceeds and to provide the framework for how the auction proceeds will be administered to further the purposes of AB 32 (Núñez, Chapter 488, Statutes of 2006). Cap-and-Trade auction proceeds have been appropriated to CARB for Low Carbon Transportation projects that reduce greenhouse gas (GHG) emissions, with an emphasis on investments that benefit the State’s disadvantaged communities. Per statute these funds must be used to further the purposes of AB 32. The Low Carbon Transportation investments build upon and greatly expand existing advanced technology and clean transportation programs, which provide mobile source incentives to reduce criteria pollutant, air toxic, and GHG emissions. In 2016, AB 1550 (Gomez, Chapter 369, Statutes of 2016) established disadvantaged community, low-income community, and low-income household targets for the State’s Cap-and-Trade auction proceeds investments.

¹ See Section C(6) for more information

Senate Bill (SB) 1204 (Lara, Chapter 524, Statutes of 2014) guides CARB's heavy-duty vehicle investments funded with Cap-and-Trade auction proceeds. SB 1204 creates the California Clean Truck, Bus, and Off-Road Vehicle and Equipment Technology Program intended to help accelerate the introduction of the next generation of cleaner heavy-duty vehicles and engines with a priority on projects that benefit disadvantaged communities. Among other requirements, SB 1204 directs CARB to develop an annual framework and plan to guide these investments. The Three-Year Investment Strategy for Heavy-Duty Vehicles and Off-Road Equipment included in the annual Funding Plan is designed to help address this requirement.

In August 2020, CARB adopted the Heavy-Duty Engine and Vehicle Omnibus Regulation and Associated Amendments, which creates a new optional standard of 0.01 g/bhp-hr NOx. HVIP can help to accelerate the market for technologies that meet the new optional standard.

The Implementation Manual, in conjunction with the Guidelines, and the corresponding Funding Plans identify the minimum requirements for implementing the program. The Implementation Manual may be periodically updated as needed to clarify project requirements and improve project effectiveness. The Implementation Manual, including any updates, will be posted on the HVIP webpage at www.CaliforniaHVIP.org and sent via email to subscribers of the HVIP listserv. Project participants are responsible for checking the HVIP website on an ongoing basis for the latest program updates.

CARB has sole discretion to determine eligibility for HVIP funding. Table 1 clarifies which fiscal year coincides with which HVIP project year.

Innovative Clean Transit Regulation

In December 2018, CARB replaced the Fleet Rule for Transit Agencies with the Innovative Clean Transit (ICT) Regulation². The ICT regulations, title 13, article 4.3, California Code of Regulations, apply to a transit agency that owns, operates, leases, rents, or contracts with another entity to operate buses in California. Vehicles that operate on rails, trolleybuses, or school buses, even if operated by a transit agency are excluded from the regulations, as well as Caltrans, Caltrain, Amtrak, or any local school district.

Starting in 2022, any transit agency subject to the ICT Regulation (title 13, California Code of Regulations, section 2020(b)) must be in compliance with all regulatory requirements and reporting in order to receive HVIP funds. HVIP voucher requests for applicable transit agencies submitted during or after 2022 will not be redeemed if the purchaser is not in compliance with ICT. HVIP will remain available to fleets purchasing a zero-emission bus prior to compliance deadlines or in excess of regulatory requirements and HVIP-funded vehicles purchased prior to or in excess of regulatory requirements can be used to count toward future requirements, where applicable. Additionally, HVIP will consider all transit agencies to be exceeding regulatory requirements and eligible for HVIP funding if the total number of ZE transit buses operating in the state exceeds Innovative Clean Transit requirements.

² <https://ww2.arb.ca.gov/our-work/programs/innovative-clean-transit>

Advanced Clean Fleets Regulation

In April 2023, CARB adopted the Advanced Clean Fleet regulation, a medium and heavy-duty zero-emission fleet regulation with the goal of achieving a zero-emission truck and bus California fleet by 2045 everywhere feasible and significantly earlier for certain market segments such as last mile delivery and drayage applications. The initial focus is on high-priority fleets with vehicles that are suitable for early electrification, their subhauliers, and entities that hire them. The goal of this effort is to accelerate the number of medium and heavy-duty zero-emission vehicle purchases to achieve a full transition to zero-emission vehicles in California as soon as possible.

The ACF regulation applies to fleets performing drayage operations, those owned by State, local, and federal government agencies, and high priority fleets. High priority fleets are entities that own, operate, or direct at least one vehicle in California, and that have either \$50 million or more in gross annual revenues, or that own, operate, or have common ownership or control of a total of 50 or more vehicles (excluding light-duty package delivery vehicles). The regulation affects medium- and heavy-duty on-road vehicles with a GVWR greater than 8,500 pounds, off-road yard tractors, and light-duty mail and package delivery vehicles.

HVIP will remain available to fleets purchasing a zero-emission truck or bus prior to compliance deadlines or in excess of regulatory requirements, including:

- Zero-emission drayage truck purchases in existing drayage fleets.
- High-priority and public fleets using the milestones option may access HVIP for any zero-emission vehicles purchased in excess of their milestone requirement. Similarly, State and local agencies not using the milestones option may access HVIP for any vehicles purchased above their requirement. For example, if a fleet on the 50 percent milestone purchases 20 trucks and 15 of those are zero-emission, five will be eligible for HVIP incentives.
- Eligible fleets purchasing zero-emission vehicles prior to a regulatory deadline will be able to access HVIP, even if those vehicles eventually are counted toward regulatory requirements. Eligibility relative to the regulatory deadline will be determined by purchase order date (high-priority and public fleets will be allowed to use a letter of intent or binding resolution in place of a purchase order).

HVIP does not prohibit vehicles receiving incentives from being used for future compliance purposes. In other words, an HVIP-funded vehicle purchased prior to or in excess of regulatory requirements, as explained above, can be used to count toward future requirements where applicable.

Table 1: Fiscal Year/HVIP Project Year

Fiscal Year	HVIP Project Year
FY 2009-10	Year 1
FY 2010-11	Year 2
FY 2011-12	Year 3
FY 2012-13	No HVIP Funding
FY 2013-14	Year 4
FY 2014-15	Year 5
FY 2015-16	Year 6
FY 2016-17	Year 7
FY 2017-18	Year 8
FY 2018-19	Year 9
FY 2019-20	Year 10
FY 2020-21	Year 11
FY 2021-22	Year 12
FY 2022-23	Year 13

Project Framework

Figure 1 illustrates a hypothetical vehicle dealer sale and voucher reimbursement transaction. Figure 2 shows the voucher request / redemption process and timeline, or the “lifecycle” of a standard voucher. HVIP provides a voucher for the vehicle incentive amount, based on corresponding vehicle voucher amount tables found in Section C to a registered HVIP dealer. The dealer provides the discount to the purchaser at the time of sale, and the voucher is redeemable by the dealer at the time the vehicle is delivered and when required voucher redemption paperwork is complete (see Appendix E, Redemption Form and Checklist).

The HVIP website includes a list of eligible trucks and buses, as well as the eligible voucher amount(s) for each vehicle. HVIP-approved dealers have access to the HVIP online Voucher Processing Center (VPC), through which a dealer completes a voucher request with the purchaser’s input and submits at the time a specific vehicle is ordered. A similar structure also applies to vehicles which are ordered directly from a manufacturer who acts as an HVIP dealer.

Figure 1: Example HVIP Truck or Bus Purchase Transaction

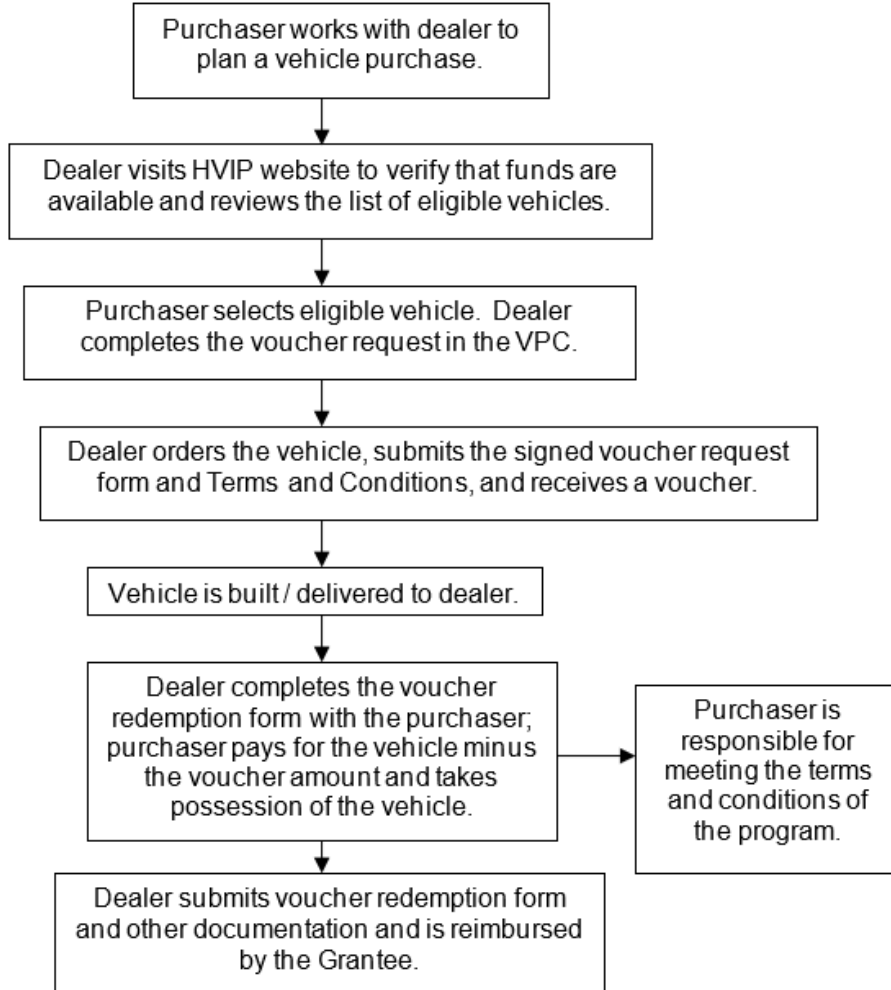

Figure 2

Voucher Progression Overview: Statuses in online Voucher Processing Center (VPC) for a Standard voucher

- Pending Submittal: Dealer enters information into Voucher Processing Center about the request (quantity, purchaser, etc.).
- Submitted: After dealer submits, the Grantee's Administrative (Admin) team conducts preliminary review (approximately 5 business days). NOTE: Individual Vouchers will not be visible in the VPC until they reach "Accepted Pending Confirmation" Status
- Queued: After preliminary review, Admin team assigns funding status or assigns request to a contingency list if available. Admin team then begins standard initial review, and dealer will have 10 days to address any issues.
- Funding Reserved: Funds are reserved from the appropriate funding source for the voucher request.
- Accepted Pending Signed Forms: Admin team sends Terms and Conditions to dealer and purchaser for review and signature. Purchaser completes additional required information.
- Accepted Pending Confirmation: Individual vouchers are visible in the VPC at this status. Dealer provides VIN and other vehicle information. Admin team conducts TRUCRS compliance review.
- Approved / Pending Delivery: Voucher must be updated every 90 days to confirm the anticipated delivery date.
- Redemption Processing: A voucher moves out of this status when the dealer has completed all items on Redemption Checklist. Redemption must occur within 18 months of the date funding is reserved, except for public transit buses which must be redeemed within 36 months of the date funding is reserved.
- Redemption Approved: Grantee's Accounts Payable mails payment to dealer (approximately 7 business days) and Purchaser will complete and submit annual survey for 3 years.
- Completed Paid: Dealer has been reimbursed.

B. VEHICLE TECHNOLOGY ELIGIBILITY

This section describes minimum criteria necessary for vehicles to obtain HVIP eligibility. Once a vehicle becomes HVIP eligible, the vehicle must continually meet the minimum criteria as stated. If a vehicle fails to continually meet the minimum eligibility criteria, the vehicle will become ineligible and will be removed from the list of eligible vehicles. Additionally, if a vehicle associated with a voucher request fails to meet the minimum eligibility criteria, the voucher request will be cancelled. If a vehicle has already been delivered and received HVIP funding, and is later found to be ineligible, the manufacturer will be responsible for returning the full amount of the HVIP voucher. It is the responsibility of the

manufacturer to ensure the vehicle meets the minimum eligibility criteria at time of vehicle delivery and voucher redemption. The manufacturer is also responsible for informing the HVIP Project Liaison if a HVIP-eligible vehicle does not meet the minimum eligibility criteria at time of vehicle delivery and voucher redemption.

CARB is responsible for evaluating and approving the eligibility of vehicles for HVIP funding. CARB, at its sole discretion, may inspect vehicles to ensure the vehicles meet all applicable local, state, and federal laws, ordinances and requirements, including but not limited to CARB certification and all applicable safety and air quality regulations. Any dealer or manufacturer that participates in HVIP must allow CARB to inspect HVIP-funded vehicles upon request or they may be deemed ineligible for HVIP and required to pay back voucher funds. Vehicles that do not comply with all applicable local, state, and federal laws can be deemed ineligible for funding. Vehicle eligibility applications are found in Appendix B. Application submittal instructions and an updated list of eligible vehicles are found at www.CaliforniaHVIP.org. Approved vehicles and engines meeting the new optional standard of 0.01 g/bhp-hr NOx will remain eligible for two years following the current vehicle or engine model year with the exception of ePTO systems. ePTO systems may be approved for HVIP eligibility for a vehicle model year range of up to five model years. The model years must be identified on the ePTO system eligibility application.

1. Requirements for All Vehicles

The vehicle, including the propulsion system, powertrain/drivetrain, batteries/energy storage system(s) and engine (if applicable) must be covered by a manufacturer warranty. The engine warranty requirements in HVIP applies to vehicles receiving funding and is not intended to supplant or limit the certification requirements. With the exception of new and repowered vehicles using engines certified to the optional Low NOx standard of 0.01 g/bhp-hr and ePTOs, HVIP eligibility applies only to vehicles identified on CARB Executive Orders (EO).

A- Prior to approving a vehicle model for addition to the List of Eligible Vehicles (Vehicle Catalog), CARB may request that the manufacturer provide copies of representative vehicle, engine and battery warranties and a description of the manufacturer's plans to provide warranty and routine vehicle service. HVIP vehicles must provide one of two warranty options described below. A manufacturer has the option to provide either warranty on any vehicle.

- i. The warranty must provide protection for a minimum of 3 years or 50,000 miles, whichever comes first, and provide full warranty coverage of, at a minimum: motor, propulsion system, powertrain/drivetrain, battery, parts and labor; or
- ii. The warranty must provide protection for a minimum of 2 years or 100,000 miles, whichever comes first, and provide full warranty coverage of, at a minimum: motor, propulsion system, powertrain/drivetrain, battery, parts and labor.

B - A vehicle is not eligible for an HVIP voucher if the same vehicle make and model is receiving public incentive funding as a research vehicle. Vehicles of the same make and model participating in pre-commercial demonstration and pilot deployment projects may be eligible for HVIP. However, the VIN of

a vehicle receiving HVIP funding may not match any vehicle participating in pre-commercial demonstration and pilot deployment project.

C- The vehicle must be a commercial, non-profit organization, or public fleet vehicle. Personal vehicles are not eligible for HVIP funding.

D- Vehicles that are approved for the Clean Vehicle Rebate Project (CVRP) are not eligible to participate in HVIP.

E- Pickup trucks and recreational vehicles / housecars are not eligible for HVIP. A pickup is defined by the California DMV as a motor truck with a GVWR of less than 11,500 pounds and equipped with an open box-type bed less than 9 feet in length. (Section 471 of the Vehicle Code). Housecars are motor vehicles originally designed, or permanently altered, and equipped for human habitation, or to which a camper has been permanently attached (Section 362 of the Vehicle Code).

F- The chassis of any vehicle receiving an HVIP voucher must be titled and licensed in California, and the vehicle must be California-registered. The delivered chassis must match the chassis listed on the corresponding CARB Executive Order.

G- HVIP eligible vehicle must be purchased from a dealer approved by the Grantee to participate in HVIP.

H - Eligible vehicles must have at least one California-based service facility affiliated with the vehicle manufacturer capable of providing product training for dealers, vehicle service, warranty service, and repairs statewide.

I - Vehicle manufacturers and California-based service providers affiliated with the vehicle manufacturer must be capable of providing vehicle service, warranty service, and repairs for eligible vehicles statewide.

J - No retrofits or other hardware or software modifications that significantly impact the vehicle's emissions characteristics are permitted. (California Vehicle Code section 27156).

K - The vehicle must meet all applicable local, state, and federal laws, ordinances and requirements, including but not limited to all applicable safety and air quality regulations.

L - Vehicles with lead-acid batteries used for traction power or ePTO operation are not eligible for HVIP. Lead-acid batteries may be used to power accessories or other justified uses.

M - For all HVIP-funded school buses, California Highway Patrol (CHP) certification is required. It is the responsibility of the school district to obtain CHP certification once the school district takes possession of the school bus.

N - Telematics data for Disadvantaged Communities: All vehicles, except military vehicles, shall be equipped with a data acquisition system capable of collecting vehicle GPS data and vehicle mileage. Telematics requirements for ePTO vehicles are covered separately in section C(5)(f). Each vehicle manufacturer shall be responsible for providing quarterly reports for each HVIP-funded vehicle to the

Grantee. Each quarterly report shall have current quarterly and cumulative data listing the following information for each HVIP-funded vehicle:

- i. Hours and percentage of total time when the vehicle is operating (operating would mean vehicle is “key on”) within a disadvantaged community (DAC)³.
- ii. Percentage of days when workday is ended in a DAC.
- iii. Total miles and percentage of total miles when the vehicles are driving within a DAC.
- iv. Each report shall be broken into two groups:
 1. Vehicles domiciled in a DAC.
 2. Vehicles not domiciled in a DAC.
- v. Grantee shall provide manufacturer a list of vehicles to be included in each quarterly report.
- vi. Vehicle manufacturers shall provide a minimum of three years of data for vehicles from the date of voucher payment.

HVIP defines DAC eligibility as a vehicle domicile address in any of the following areas of the map at <https://webmaps.arb.ca.gov/PriorityPopulations/>

- Disadvantaged Communities = Yellow on map legend
- Disadvantaged AND Low Income Communities = Green (Yellow AND blue on map legend)
- Low Income Communities within ½ mile of a Disadvantaged Community = Crosshatched purple on map legend
- Low Income Households within ½ mile of a Disadvantaged Community = Crosshatched grey on map legend

2. New Zero-Emission Vehicles

Hydrogen fuel cell and battery electric-powered vehicles emit zero tailpipe emissions and are eligible for HVIP. Other technologies, which emit zero-emissions when in operation, may be considered for HVIP eligibility on a case-by-case basis. Hydrogen Fuel cell vehicles must not have plug-in capacity.

- a. The vehicle must be a new vehicle as defined in California Vehicle Code Section 430.⁴

³ <https://calepa.ca.gov/EnvJustice/GHGInvest/>

⁴ Per section 430 of the California Vehicle Code, a "new vehicle" is a vehicle constructed entirely from new parts that have never been the subject of a retail sale, or registered with the California Department of Motor Vehicles, or registered with the appropriate

- b. For the purposes of HVIP, a new chassis that has been converted with aftermarket parts or equipment to create a zero-emission vehicle is not considered a new vehicle, unless the completed zero-emission vehicle has obtained CARB new vehicle certification. HVIP-eligible vehicle (and vehicle chassis) must be new and not yet have been registered in any state or paid for by the purchaser (other than a vehicle down payment) in order to receive a voucher. Used vehicles (including vehicles used by dealers, manufacturers, or other entities or for demonstration purposes) are not eligible for HVIP. Any delivered chassis must match the chassis listed on the corresponding CARB Executive Order.
 - i. A Vehicle Emissions Control Information (VECI) label must be provided on the chassis and the information must match the CARB Executive Order.
- c. Zero-emission vehicle makes/models must fall into one of the following categories to apply to CARB for HVIP eligibility:
 - i. Zero-emission vehicles from 8,501 to 14,000 lbs GVWR that are CARB-certified as Type I, I.5, II or III zero-emission vehicles as defined in the California ZEV Regulation (Section 1962(d)(5)(A), Title 13, California Code of Regulations (CCR) for 2003-2008 model year vehicles and Section 1962.1(d)(5)(A), Title 13, CCR for 2009 and subsequent model years). Those vehicles from 8,501 to 10,000 lbs GVWR may apply for HVIP eligibility; however, eligibility for this lightest vehicle class is provided on a case-by-case basis only if the vehicle is exclusively for commercial (not personal) use, and meets the intent of HVIP.
 - ii. Zero-emission vehicles above 14,000 lbs GVWR that are CARB-certified. The manufacturer must also certify that the vehicle model complies with all applicable federal safety standards for new motor vehicles and new motor vehicle equipment issued by the National Highway Traffic Safety Administration. The Federal Motor Vehicle Safety Standards are found in Title 49 of the Code of Federal Regulations (CFR) Part 571.
 - iii. If a written statement and documentation have been previously provided to CARB in the course of applying for CARB approval/certification of the vehicle model, no additional written statement is required.
- d. The vehicle must demonstrate a minimum 35-mile all-electric range (AER). CARB retains sole authority to determine the appropriate procedure to perform AER demonstration.
- e. The vehicle must be demonstrably designed exclusively for commercial use (i.e. not intended for private or non-commercial use).
- f. Zero-emission terminal and yard trucks were transitioned to the Clean Off-Road Equipment (CORE) Voucher Incentive Project in February 2020, and are no longer eligible for HVIP funding.
- g. Zero-Emission Powertrain Certification (ZEP Cert) is required for all zero-emission powertrains

agency or authority of any other state, District of Columbia, territory or possession of the United States, or foreign State, province, or country.

installed in zero-emission vehicles.

3. Zero-Emission Vehicle Conversions

This section applies to new or in-use vehicles with any fuel type that convert to zero-emission, including battery electric and hydrogen fuel cell technologies. Hydrogen Fuel cell vehicles must not have plug-in capacity.

- a. For conversions of any type of vehicle to zero-emission, the aftermarket conversion kits must receive an exemption executive order (EO) from CARB.⁵
- b. A voucher will not be issued until the vehicle conversion is verified by the Grantee, CARB, or CARB's designee.
- c. The maximum chassis age for zero-emission vehicle conversions is ten years. CARB may consider chassis older than ten years on a case-by-case basis.
- d. Refer to the voucher tables in this document for zero-emission vehicle conversion voucher amounts.
- e. Conversions must demonstrate proof of compliance with the AER requirements.
- f. If a vehicle has an Executive Order Relating to Conversion of On-Highway Vehicles to Electricity, (Conversion EO) the vouchers requested for that vehicle must be a Conversion Voucher.

4. New Plug-In Hybrid Vehicles

- a. The vehicle must be a new vehicle as defined in California Vehicle Code Section 430.⁶
- b. The vehicle must demonstrate a 35 percent improvement or greater in fuel economy relative to its baseline and a minimum 35-mile all-electric range (AER).
- c. For the purposes of HVIP, a new chassis that has been converted with aftermarket parts or equipment to create a hybrid vehicle is not considered a new vehicle, unless the completed hybrid vehicle has obtained CARB new vehicle certification. HVIP-eligible vehicle (and vehicle chassis) must be new and not yet have been registered in any state or paid for by the purchaser (other than a vehicle down payment) in order to receive a voucher. Any delivered chassis must match the chassis of the corresponding CARB Executive Order.
- d. Used vehicles (including vehicles with over 3,500 miles) are not eligible for HVIP.

⁵ For more information, go to: <https://ww3.arb.ca.gov/msprog/aftermkt/aftermkt.htm>

- e. Plug-In Hybrid vehicle makes/models must fall into one of the following categories to apply to CARB for HVIP eligibility:
 - i. A plug-in hybrid vehicle from 8,501 to 10,000 lbs GVWR which is CARB-certified to be sold in California.
 - ii. A CARB-certified plug-in hybrid commercial vehicle between 6,001 and 8,500 lbs may apply for HVIP eligibility; however, vouchers for these vehicles are provided on a case-by-case basis only if a vehicle manufacturer and purchaser can demonstrate the vehicle is for commercial (not personal) use only and meets the intent of HVIP.
 - iii. A plug-in hybrid vehicle greater than 10,000 lbs GVWR which is CARB-certified to be sold in California as an original, newly manufactured vehicle must follow emission testing requirements within the Innovative Technology Regulation (ITR)⁷ for the pathway to HVIP funding eligibility. All A to B testing performed using ITR must result in no increased NOx emissions compared to the equivalent baseline vehicle and demonstrate a minimum 35-mile AER. Manufacturers will be required to present a (portable emissions measurement system) PEMS or chassis dynamometer testing plan that complies with ITR testing requirements. CARB has sole discretion to review and approve the testing plan.
- f. The plug-in hybrid vehicle may not emit more NOx emissions compared to the equivalent baseline vehicle.
- g. The vehicle must use a CARB-certified engine operating on in-state renewable fuel. The engine must be appropriately matched for the intended service class of the hybrid vehicle in which it is used.
- h. A plug-in hybrid vehicle engine must be new.
- i. Modifications to engine performance (including changes in horsepower), emissions characteristics, engine emission components (not including repairs with like-original equipment manufacturers replacement parts), or any other modifications to the engine's emission's control function is not allowed (Vehicle Code section 27156).

5. Vehicles with ePTO

The following vehicle eligibility requirements apply to vehicles equipped with ePTO

- a. Vehicles with an ePTO powered by lead acid battery technology are not eligible.
- b. Vehicles whose ePTO is powered by a battery chemistry other than lithium ion or other zero-emission technology will be considered for HVIP funding eligibility on a case-by-case basis, with voucher amounts dependent upon technology incremental cost, potential for technology

⁷ <https://ww3.arb.ca.gov/regact/2016/itr2016/hybconvproc.pdf>

transfer to other vehicle or equipment applications, and other criteria.

- c. An ePTO system must use alternating current (AC) to power the electric motor and have a voltage of at least 40 volts. An ePTO system using direct current may be approved by CARB Project Liaison on a case-by-case basis based upon evidence the system is robust and will not compromise workplace safety.
- d. The vehicle ePTO system must demonstrate ability to charge from the battery manufacturer recommended minimum state-of-charge (i.e., the remaining battery voltage defined by the manufacturer at which the vehicle engine will turn on to recharge the ePTO battery) to fully charged within twelve hours when plugged in. The manufacturer recommended minimum state-of-charge utilized during HVIP eligibility application ePTO demonstration may not be adjusted in-use for a minimum of three years from the vehicle's HVIP voucher redemption date.
- e. When the ePTO system is engaged at the jobsite, heating, ventilation, and air conditioning (HVAC) cab comfort must be powered by the ePTO battery.
- f. The vehicle must include a telematics device that electronically tracks:
 - i. Vehicle location
 - ii. Time of operation in ePTO mode
 - iii. Telematics data for DACs: All work vehicles with ePTO, except military vehicles, shall be equipped with a data acquisition system capable of collecting vehicle GPS data. Each vehicle manufacturer shall be responsible for providing quarterly reports for each vehicle to the Grantee. Each quarterly report shall have current quarterly and cumulative data listing the following information:
 - a. Hours and percentage of total time when the vehicles are parked and operating in ePTO mode (engine off, providing work power from batteries) within a DAC.
 - iv. Each report shall be broken into two groups:
 - a. Vehicles domiciled in a DAC.
 - b. Vehicles not domiciled in a DAC.
 - v. Grantee shall provide manufacturer a list of vehicles for each quarterly report.
 - vi. Vehicle manufacturers shall provide a minimum of three years of data for vehicles from the date of voucher payment.
 - vii. For DAC mapping data files, please visit CARB's Disadvantaged and Low-income Communities Investments website at:
<https://www.arb.ca.gov/cc/capandtrade/auctionproceeds/communityinvestments.htm>
- g. Class 5/6 ePTO Plug-In Requirement:

- i. Class 5/6 ePTO Plug-In Vehicle purchasers must agree to provide access to necessary charging equipment at the domicile location, or a copy of their company's charging policy showing plug-in access.
- h. Work vehicles with ePTO may be deemed HVIP-eligible by CARB staff based on a demonstration that the vehicle engine does not idle to recharge the battery or to power the truck mounted hydraulic, pneumatic or electric work equipment utilized for performing stationary work in a typical workday.

The use of video conferencing and/or telematics data collection may be utilized for ePTO demonstrations, unless the CARB Project Liaison specifies otherwise. The CARB Project Liaison and manufacturer applicant will agree on the demonstration method on a case-by-case basis.

 - i. The CARB Project Liaison may also require in-person demonstration. In-person demonstration must be conducted within a 100 mile radius of CARB headquarters in Sacramento, California unless an alternate location is preapproved by the CARB Project Liaison.
- i. The following procedures are required for the demonstration of utility bucket trucks. The CARB Project Liaison or designee may approve in writing modifications to the ePTO demonstration procedures listed below.

Demonstration of ePTO Systems on Aerial Vehicles with GVWR 26,001+ lbs

The ePTO demonstration consists of three steps:

- The CARB Project Liaison or designee approves in writing a vehicle and ePTO duty cycle that reflects a typical work day. The duty cycle must include the following parameters:
 - At least 45 minutes of total boom movement with at least 175 lbs in the bucket, including a minimum of 22.5 minutes of vertical boom movement and 22.5 minutes of horizontal boom movement. Each boom movement must extend to maximum achievable boom left/right and up/down positions.
 - At least five minutes of air conditioning, running at maximum capacity with the cab windows closed.
 - Vehicles with a battery charge while driving feature may include up to one hour of driving as part of the duty cycle. Drive cycles will be considered by the CARB Project Liaison on a case-by-case basis, and must reflect a suburban driving environment (i.e. moderate speeds and number of stops).

Demonstration of ePTO Systems on Aerial Vehicles with GVWR 16,000-26,000 lbs

Due to differing duty cycles of Class 5 and Class 6 aerial vehicles, the following demonstration is required for ePTO installed on aerial vehicles with GVWR between 16,001-26,000 lbs.

The work cycle is defined as 6 job sites with 10 miles between each job site. At each job site, the vehicle will perform one aerial boom cycle as defined below.

- An aerial boom cycle consists of taking the aerial device from the stowed position, to a defined working position, and returning to the stowed position.
 - From stowed to the working position: Activate upper and lower boom simultaneously until upper boom reaches 45 degree above horizontal and lower boom is completely unfolded or vertical. Rotate machine 90 degrees. Extend upper boom if unit is equipped with a telescopic boom section.
 - From working position to the stowed position: stow the unit fully in the reverse order, retracting telescopic boom sections, rotating, and lower the upper and lower boom simultaneously. A cycle is considered completed once the aerial device has returned to the stowed position.
 - ePTO systems must be able to perform the below defined demonstration without fully depleting the ePTO battery and without engine auto-start in order to be eligible for funding. During the ePTO demonstration, the battery state-of-charge (SOC) must be recorded for each of the steps below. The ePTO demonstration consists of the following:
 - Park the test vehicle at the test site and conduct pre-operational safety procedures, as applicable.
 - Place the vehicle into ePTO mode and set the outriggers, if applicable
 - Engage the aerial device controls and perform one aerial boom cycle (as described above)
 - Return aerial boom to the stowed position and operate at least five minutes of air conditioning, running at maximum capacity with the cab windows closed.
 - Drive vehicle for a total of 10 miles and return to test site.
 - Repeat steps 1-5 to simulate a second jobsite.
 - Repeat steps 1-5 to simulate a third jobsite.
 - Repeat steps 1-5 to simulate a fourth jobsite.
 - Repeat steps 1-5 to simulate a fifth jobsite.
 - Repeat steps 1-5 to simulate a sixth jobsite.
 - Record final battery SOC.
- j. For the demonstration of non-utility bucket truck ePTO systems, the CARB Project Liaison and manufacturer applicant will develop and agree on the testing procedure on a case-by-case basis.

6. New and Repowered Vehicles Using Engines certified to the optional Low NOx standard of 0.01 g/bhp-hr

Below are the minimum criteria necessary for a vehicle equipped with or repowered with an engine certified to the optional Low NOx standard of 0.01 g/bhp-hr. Once a vehicle is equipped with such an engine, the vehicle must continually meet the minimum criteria as stated. The telematics requirement (Section B(1)(l)) does not apply to this section.

- a. New vehicles must be equipped or repowered with an engine certified to 0.01 g/bhp-hr
- b. The engine must be covered by a manufacturer warranty. The warranty must provide protection for a minimum of 3 years or 50,000 miles, whichever comes first or 2 years or 250,000 miles, whichever comes first.
- c. The engine warranty requirements in HVIP applies to vehicles receiving funding and is not intended to supplant or limit the certification requirements. The emissions warranty specified in title 13 CCR section 2036, remain applicable to engines used in HVIP-funded vehicles. For example, for an engine used in a heavy heavy-duty Class 8 vehicle (33,000 lbs. and greater gross vehicle weight rating) that is funded, the engine emissions warranty would be as specified in title 13 CCR section 2036.
- d. If the engine is for a repower, the engine repower must be performed by an installer authorized by the engine manufacturer.
- e. Fleets using natural gas internal combustion engines are required to self-certify per the Terms and Conditions that they are refueling with 100% California-produced Renewable Natural Gas (RNG) for a minimum of three years, either at public stations, via a fuel contract, or both.

Annual Participant Surveys are sent to HVIP purchasers in the fall. Continued usage of renewable fuel will be monitored via the Survey for a three-year period following voucher redemption. Fleets that fail to submit the annual vehicle surveys/questionnaires as required from any HVIP funding year may be ineligible for additional HVIP vouchers while this information remains outstanding.

CARB, at its sole discretion, may request documentation from Natural Gas Internal Combustion engine purchasers to verify the use of 100 percent California-produced RNG. Natural Gas Internal Combustion engine purchasers not adhering to the in-State RNG requirement may be barred from eligibility for HVIP and other CARB incentives.

C. VOUCHER REQUIREMENTS

HVIP vouchers shall only be provided for a specific vehicle or engine certified to the optional Low NOx standard of 0.01 g/bhp-hr ordered and purchased by a specific customer. The dealer must work with the vehicle or engine purchaser to complete the HVIP voucher request form (available once a voucher request is submitted through the Voucher Processing Center (VPC)). **Except for a transit voucher request submitted with a letter of intent, submittal of a voucher request not associated with a binding**

complete vehicle order is prohibited. Voucher requests submitted for vehicles that have already been delivered, paid for, and/or registered will not be accepted.

Only vehicles approved by CARB and listed as eligible on the HVIP webpage may receive a voucher. HVIP funds the purchase/order of a completed vehicle, a vehicle that requires no further manufacturing operations to perform its intended function, upon delivery to purchaser.

For the purposes of HVIP, the Purchaser is the fleet that will purchase or lease the eligible vehicle and operate the vehicle for at least three years. Generally, communications and responsibilities are exclusively with the dealer identified on the HVIP voucher request⁸.

A vehicle dealer must provide CARB (or its designee) with all requested information related to compliance with HVIP requirements or any vehicle(s) purchased with a HVIP voucher within 10 calendar days of CARB's written request for such information. Requested information may include but is not limited to purchase orders or agreements and vehicle payment information and related bank records. Vehicle dealers must respond to inquiries from purchasers and prospective purchasers within 5 business days of receiving any such outreach.

For new-vehicle vouchers, the dealer must sell the entire HVIP-eligible completed vehicle or completed vehicle with engine certified to the optional Low NOx standard of 0.01 g/bhp-hr to the purchaser. Voucher requests for incomplete vehicles, including vehicles without the body installed, and zero-emission powertrains/drivetrains alone are prohibited and are subject to cancellation at the point of voucher request.

A dealership, manufacturer, or leasing entity is not a purchaser. A purchaser with active vouchers, or any entity that has ever participated as a purchaser in HVIP, may not become an HVIP approved dealer. A purchaser is not a manufacturer, dealership, leasing company, or any entity that enters into any agreement with another party to operate the vehicle. Dealerships, leasing entities, vehicle rental providers, manufacturers, and any entities under common ownership or control with such establishments are prohibited from requesting a voucher as a purchaser. Entities, including entities under common ownership or control, that have been identified as a dealership, leasing entity, or manufacturer in past HVIP transactions are prohibited from requesting new vouchers as a purchaser.

1. Voucher Request

A valid signed Purchase Order (or other binding Agreement, Contract, Buyer's Order, or action/resolution by a government entity's governing body) from the dealer to purchaser is required at the time a voucher request is made for vehicles purchases and leases, excluding requests submitted with a letter of intent for public transit agencies. Non-binding agreements or quotes are not sufficient to reserve a voucher. The Purchase Order must include the purchaser and dealer names, HVIP voucher amount, number of units (if a batch request), model name and year of the vehicle as listed on the CARB

⁸ Exceptions may apply to vouchers involving Bulk Purchase Requirements.

EO, issued date, HVIP eligible vehicle description, and the purchaser's signature. The purchase order provided by the dealer must represent a real vehicle order that is ready to be placed. Voucher requests submitted with a purchase order / sales agreement that is missing any of this mandatory information may be subject to cancellation at the point of voucher request.

In cases where a public entity's governing body plans for final approval of the binding agreement after the award of HVIP funds, a letter stating the date by which documentation of final approval will be provided must be included at the time of the voucher request, signed by an authorized representative of the public entity. With approval from CARB or its designee, a public entity may use the same binding agreement for two different voucher requests. For example, if an agreement is for 60 vehicles, the purchaser can use the agreement in one calendar year for 30 and then in the next calendar year for the additional 30.

A Letter of Intent (LOI) is permitted for transit agencies in lieu of a purchase order at the point of voucher request submission. The date of signature on the LOI may be no earlier than 1/1/2023. A purchase order or other binding agreement) will be required within 6 months of submission, otherwise the voucher requests will be cancelled. Case by case requests for accommodation of longer procurement timelines for public fleets can be submitted to voucherprocessing@tetrattech.com.

Purchase orders submitted for this funding year must be dated March 30, 2022 or later.

Once a voucher request is submitted-- along with the purchase order or other binding sales agreement representing a real vehicle order-- the dealer, vehicle, and fleet information, cannot change. The domicile address cannot be changed without CARB approval. If the voucher is for a lease, the lessee (end-user fleet / purchaser) cannot be changed. If either the dealer, fleet or vehicle information changes after a voucher request is submitted, that voucher will be cancelled. A new voucher may be requested, contingent on funding availability, with the new dealer, vehicle, or purchaser / lessee information. Voucher requests cannot list any HVIP-approved dealer, leasing entity, manufacturer, and any entities under common ownership or control with such establishments as the purchaser or lessee.

A fleet size of zero is not acceptable. If a voucher represents the first purchase of a vehicle with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California, a fleet size of "1" should be entered.

A residential address may NOT be used as a vehicle domicile location unless specifically approved by CARB or its designee. Purchasers intending to use a residential address as a vehicle domicile location must provide a letter of explanation as to the commercial use of the residential property to voucherprocessing@tetrattech.com at the time of voucher request, or the voucher will be cancelled. The letter must explain the infrastructure and parking parameters to support the vehicles identified in the voucher request at the residential location that make it suitable for commercial use, the number of commercial vehicles domiciled on the site, and the date that commercial vehicle activity started at the site. The letter also must include a copy of the purchaser's charging policy and strategy showing plug-in access for all HVIP-funded vehicles domiciled at the site. CARB or its designee may require the purchaser to demonstrate reasonable access to necessary charging/fueling equipment at the domicile

location located in California and parking capability to support all the vehicles identified in the voucher request.

For school bus vouchers, the domicile address must be affiliated with the school district purchasing the vehicle.

Within 10 calendar days after any voucher request, dealers must: 1) Provide the purchaser's Truck and Bus Regulation (TRUCRS) ID or compliance certificate to the Voucher Processing Center. If a TRUCRS ID is not available, a signed letter from the fleet purchaser stating that the fleet purchaser is not subject to TRUCRS must be submitted within 30 calendar days to voucherprocessing@tetrattech.com. 2) Address any missing information that may have been identified during the initial review of the voucher request, such as a missing Taxpayer Identification Numbers (TIN) or California Carrier Identification Number (CA#), domicile location clarification, or vehicle model year confirmation. Dealers will be contacted within 5 business days of a voucher request regarding any missing information that must be addressed.

The dealer must also provide the vehicle identification number (VIN) (and serial number for repowers) that uniquely identifies the vehicle, along with the vehicle expected delivery date, within 60 calendar days of voucher acceptance. Serial numbers, production numbers, factory build sheets, or other documentation that confirms that the dealer has made an order with the manufacturer may be accepted in lieu of a VIN with CARB's approval; dealers must notify the Voucher Processing Center of the intention to use other documentation. The Grantee may reject the voucher after 60 calendar days if the VIN or other documentation is not provided or does not match the vehicle identified on the voucher request. If the VIN is not available for more than 60 calendar days, the dealer should inform the grantee in advance. VINs are not required to be submitted for vouchers that are subject to an OEM Cap Exceedance review until the vouchers are accepted by CARB. The VIN on the delivered vehicle must match the VIN initially provided.

The VIN model year is required to be identical to the EO model year for voucher processing. A letter of attestation may be provided by the manufacturer to resolve any misalignment between VIN model year and EO model year for the purpose of submitting an accurate voucher request and for voucher redemption. The letter of attestation must specify the VIN model year(s), vehicle models names, and EOs associated with the vehicles. The letter must also include language stating that the manufacturer will be responsible for returning HVIP voucher funds and for any CARB penalties should there be any issues resulting from the VIN model year and EO model year misalignment. Please contact voucherprocessing@tetrattech.com for more information on the letter of attestation.

Once all voucher request forms and information are received by the Grantee, the voucher request is considered Accepted to the next status of the voucher process.

Automated emails from the Voucher Processing Center will be sent directly to the Dealer regarding voucher status and required actions. However, purchasers will also receive notifications 1) when the Dealer requests a voucher on their behalf, and when funding is secured, 2) when the voucher has been redeemed by the Dealer, and 3) in any instance wherein the voucher is cancelled for any reason.

Purchasers should notify voucherprocessing@tetrattech.com if the email address that should receive these messages changes. Dealers must keep their contact information current by updating dealertraining@californiahvip.org.

Dealers and purchasers are required to use email addresses and other contact information affiliated with the business on whose behalf they are participating in HVIP. Use of personal contact information (i.e. using general domains such as @gmail and @yahoo) is prohibited unless business-affiliated contact information is the same as personal contact information.

The dealer and purchaser are responsible for checking the HVIP website on an ongoing basis for the latest program updates.

AB 794 Attestation to Compliance with Labor Laws Pursuant to Assembly Bill 794⁹, beginning with the 2022–23 fiscal year, a fleet purchaser of new drayage and short-haul trucks is eligible to participate in an incentive program if it can demonstrate that it does not have any applicable law violation at the time of applying for the incentive, is not on the list maintained by the Division of Labor Standards Enforcement under Section 2810.4 of the Labor Code, and attests it will retain direct control over the manner and means for performance of any individual using or driving the vehicle.

Prior to submitting voucher requests, drayage and short haul fleets of 1 or larger, must submit a public attestation online at: <https://www.cazevlaborlawcompliance.org/s/> that they are in full compliance with all labor laws including Section 2810.4 of the Labor Code and in compliance with all Assembly Bill 794 conditions. Complaints received against fleets alleging labor law violations or false attestations will be investigated and referred to the state labor law agencies, as appropriate. Attestations must be renewed annually while participating in the incentive program; failure to do so will result in ineligibility to participate in the incentive program.

2. Voucher Caps and Fleet Size Limits

Purchaser cap: Each fleet /purchaser is limited to placing 30 voucher requests per calendar year, except for drayage fleet / purchasers which are limited to placing 50 total voucher requests per calendar year, cumulatively in the set-asides and HVIP standard funds. Vehicles under common ownership or control are considered part of a single fleet even if they are part of different subsidiaries, divisions, or other organizational structures of a company or government entity. If a fleet already has requested the maximum allowable number of vouchers and the vouchers are unredeemed and at the status of “Accepted” or higher in the Voucher Processing Center in a given calendar year, any additional requests for that fleet will be rejected and the dealer and fleet will be notified. Any redeemed vouchers that were requested in the same calendar year are exempt from the voucher cap. For example, if a fleet receives vouchers for 30 trucks, and the truck manufacturer delivers / redeems 20 of those truck vouchers within

⁹ Full text available here: [Bill Text - AB-794](#)

the calendar year, the fleet would be eligible to request another 20 vouchers before the end of the calendar year, depending on funding availability. (In other words, vouchers redeemed can be replaced with an equal number of new voucher requests, up to the cap). It is the responsibility of the dealers to determine fleet eligibility before requesting a voucher.

If a waitlisted request is made in a different calendar year than the calendar year in which it is converted to funded status, the fleet cap applies to the year in which it is converted to funded status. For example, if a fleet places a waitlisted request for 20 delivery vans in 2022 and the request moves off the waitlist and is funded¹⁰ in 2023, the fleet has 20 vehicles toward its 30-voucher cap for 2023.

If a voucher or batch is cancelled in a subsequent calendar year to the year in which it was requested, and is then re-requested through another Dealer / Manufacturer in the subsequent year, CARB has sole discretion to permit that the new request counts toward the fleet cap of the original request year, and not the subsequent year. A request for such approval must be submitted to voucherprocessing@tetrattech.com, and CARB will not consider approval unless the entire order is moving to a different manufacturer that can deliver on a faster timeline than the cancelled order.

Manufacturer cap: The manufacturer rolling “soft” cap allows each manufacturer to hold up to 100 unredeemed vouchers at a time across all of the manufacturer’s HVIP-eligible product line, which includes the parent company and its subsidiaries/"brands" unless vehicles from the separate brands are produced at separate manufacturing sites. Requests from fleets size 10 and smaller submitted on or after January 1, 2023 do not count toward the 100 voucher cap. As a manufacturer redeems vouchers, more vouchers will become available for vehicles from that manufacturer. Under the “soft” cap, manufacturers can be granted additional vouchers beyond the cap on a case-by-case basis.

The cap applies across HVIP funding types, including set-aside funding for drayage, transit, and school bus. The cap does not prevent vouchers from being requested for a manufacturer’s technologies; rather it triggers the requirement for a case by case review process by CARB in order for those additional vouchers to be accepted. OEMs that maintain an average voucher redemption rate of at least 50 over any 6-month period or 100 over any 12-month period starting January 1, 2023 are not subject to the cap. If a batch request causes the cap to be exceeded, the quantity of voucher requests in the batch that are below the cap can proceed while the quantity that are above the cap will require case by case review.

If a manufacturer has 100 unredeemed vouchers and the manufacturer or a dealer wants to request additional vouchers, the manufacturer may submit a request to voucherprocessing@tetrattech.com for consideration at CARB’s sole discretion. The request must provide the details of the request and must be signed by the manufacturer, using the submittal form provided by the Voucher Processing Center team. The request must affirm the production timeframe and ability to deliver within the maximum allowed voucher term of 540 calendar days for all currently unredeemed vouchers. The evaluation includes documentation from the manufacturer regarding their build progress and delivery plan for unredeemed vouchers as well as past delivery performance. The manufacturer is responsible for providing any

¹⁰ Funded is defined here as a budget has been approved and available to fund the vouchers on the waitlist

information requested by CARB (or its designee) to support the case-by-case evaluation within 10 calendar days of CARB’s written request for such information.

When CARB is reviewing an OEM Cap Exceedance request, a VIN is not required for vouchers that are over the cap until CARB’s review of the request is complete, and only if the request is approved. The Voucher Processing Team will notify the affected dealer/OEM of the outcome of the request, at which point the VIN must be provided for each approved voucher request within 60 days.

Manufacturers shall contact voucherprocessing@tetrattech.com for instructions on how to submit a case by case request. A manufacturer who receives a cap exceedance approval or denial may re-submit for reevaluation by CARB after no fewer than 90 calendar days.

Vouchers exceeding 100 will remain in the Voucher Processing Center — maintaining their reserved funds and place relative to other voucher requests — during case-by-case review, however they will not advance to the status of Accepted Pending Confirmation in the Voucher Processing Center until and unless approved by CARB. If a manufacturer’s request to exceed the manufacturer cap is approved, vouchers will be accepted in the order they were submitted, unless otherwise approved by CARB. If a manufacturer’s request is denied, all voucher requests exceeding 100 unredeemed vouchers will be cancelled, in the order submitted unless otherwise specified by CARB.

If a vehicle(s) is ready to be delivered but its voucher is subject to an ongoing OEM Cap Exceedance review, redemption approval may be granted at CARB’s sole discretion by contacting voucherprocessing@tetrattech.com

At CARB’s sole discretion, purchasers associated with vouchers cancelled due to cap exceedances may be given CARB approval to transfer their voucher(s) to a different participating manufacturer.

Dealers can view the number of unredeemed vouchers per manufacturer via the Voucher Processing Center on an ongoing basis via a dashboard graphic. Manufacturers who do not have VPC access will receive this same information via email quarterly and also can receive this same information by contacting voucherprocessing@tetrattech.com

If CARB sets a new voucher cap for an OEM that is greater than 100, but requests still exceed the new cap limit that CARB has set, the additional requests beyond the new cap will be cancelled in the order received, or as otherwise instructed by CARB.

Fleet Size Voucher Adjustments:

Starting January 1, 2023, base voucher amounts are modified according to the table below.

Voucher Adjustment Type	Voucher Adjustment Base Amount
Public and Private fleets with 10 or fewer vehicles above 8,500 lbs.	+15%

Public fleets with 11 or more vehicles above 8,500 lbs.	0%
Private fleets with between 11 and 100 vehicles above 8,500 lbs.	0%
Private fleets with between 101 - 500 vehicles above 8,500 lbs.	-20%
Private fleets with more than 500 vehicles above 8,500 lbs.	-50%

Public fleets and California Native American tribal government fleets with 11 or more vehicles above 8,500 lbs. and private fleets with 11-100 vehicles above 8,500 lbs. are not subject to the voucher amount reductions in the table above.

Additionally, purchases of zero-emission fuel cell vehicles are not subject to the voucher amount reductions in the table above. Purchases by 501(c)(3) nonprofit organizations also are exempt from the reductions

The Plug-in Hybrid and In-Use Converted/Remanufactured voucher modifiers (-50 percent) are considered voucher base adjustments and are applied first and establish the new base voucher amounts that any other voucher adjustments or modifiers are applied to.

Voucher base adjustments will be applied first and will compound with other modifiers. For example, a purchase of a Class 8 battery-electric truck (\$120,000) by a private fleet with 150 vehicles (-20 percent) that will be used for drayage operations (+25 percent) would receive the adjusted base voucher amount (\$96,000) plus the sum of its modifier (\$96,000 * 25 percent = \$24,000), or \$120,000.

Bulk Purchase Requirement:

Starting January 1, 2023, private fleets with more than 500 vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California (including unregistered and inoperable vehicles) must present a purchase order(s) for at least 30 HVIP eligible vehicles, and HVIP funding will be applied only for vehicles purchased above 30. For example, if a fleet with 600 vehicles purchases 55 ZEVs, they would be eligible to receive 25 HVIP vouchers. The existing purchaser voucher request limit of 30 per calendar year (50 for drayage trucks) applies regardless of the size of the bulk order. Yard trucks and other off-road vehicles do not count toward the fleet size.

HVIP vouchers for fleets in this size range are discounted to 50 percent of the base voucher amount per the table above, and must be applied to vehicles deployed in California in disadvantaged communities. HVIP voucher requests for vehicles not domiciled in a DAC will be cancelled. The non-HVIP-funded vehicles in the bulk order do not need to be domiciled in a DAC.

HVIP defines DAC eligibility as a vehicle domicile address in any of the following areas of the map at <https://webmaps.arb.ca.gov/PriorityPopulations/>

- Disadvantaged Communities = Yellow on map legend
- Disadvantaged AND Low Income Communities = Green (Yellow AND blue on map legend)
- Low Income Communities within ½ mile of a Disadvantaged Community = Crosshatched purple on map legend

Low Income Households within ½ mile of a Disadvantaged Community = Crosshatched grey on map legend

Bulk orders can be comprised of multiple vehicles from the HVIP catalog, from multiple dealers. If the bulk order is all from one dealer, then the dealer will submit the PO when the voucher request is submitted. If the bulk order is from multiple dealers, the dealer will submit the PO for the HVIP-funded vehicles, and the purchaser will be responsible for providing the PO(s) for the 30+ non-HVIP-funded vehicles to voucherprocessing@tetrattech.com before the voucher can progress to the status of Accepted Pending Signed Forms in the VPC.

There is no required minimum threshold of the unfunded vehicles that must be delivered before the HVIP-funded vouchers in that bulk order are eligible to be redeemed, however the purchaser must submit DMV registration and a signed final invoice as proof of delivery of each of the 30+ non-HVIP-funded vehicles that comprise the bulk order to voucherprocessing@tetrattech.com within 18 months of the date the bulk order is requested. DMV Form REG397 (request for registration) may be submitted in lieu of completed registration, however completed registration must be provided within 180 days.

After a purchaser satisfies the bulk order requirement by having a PO(s) for 30 non-HVIP-funded vehicles in a calendar year, the purchaser is eligible to request up to their fleet cap amount in that year without submitting another bulk order. For example, if a purchaser satisfies the bulk purchase requirement in January with 30 non-HVIP-funded vehicles and 2 HVIP vouchers, and then purchases another 6 HVIP-funded vehicles in March, their January bulk PO(s) would fulfill the March order's bulk requirement.

Bulk purchases are not required for fuel cell vehicles; they can be purchased in any quantity. Also, 501(c)(3) nonprofit organizations are exempt from the bulk purchase requirement.

Before voucher redemption, additional verification of fleet size may be required at CARB's sole discretion, including site visits.

Fleet Size Limits and Updated Definition:

Starting January 1, 2024, consistent with the Advanced Clean Fleet Regulation¹¹, HVIP's fleet size definition will include ALL vehicles owned directly or under common ownership, including those domiciled or operated outside of California.

3. Voucher Renewal

A voucher will be valid for 90 calendar days from the date it is assigned funding by the Grantee and must be renewed by the participating dealer at any point within those 90 calendar days through the modification of the electronic voucher record online. Renewal of the voucher automatically reserves the voucher funding for an additional three months. A voucher not renewed within a three-month period may be cancelled at CARB's sole discretion.

¹¹ <https://ww2.arb.ca.gov/sites/default/files/barcu/regact/2022/acf22/acffroa2.pdf>

A voucher may be renewed at three-month intervals for up to a total of 540 calendar days from the time of the electronic voucher request (or the date funding was confirmed, if different), and must be redeemed at that point. Request for voucher extensions beyond 540 calendar days will be reviewed by the Grantee in consultation with CARB on a case-by-case basis. A decision regarding extension of the voucher reservation beyond 540 days shall be made by the Grantee in consultation with CARB, and shall be based upon factors, including but not limited to the projected vehicle DMV registration date, demand from other participants for remaining available HVIP funding, and the good faith efforts of the purchaser, dealer and manufacturer to complete the purchase and place the vehicle into service. CARB has sole discretion to cancel vouchers exceeding the 540 day limit. The Grantee must maintain written documentation regarding approval of voucher reservations that are extended beyond 540 calendar days for three years after voucher redemption.

4. Voucher Redemption

Only completed and accurate voucher redemption forms will be accepted. A voucher shall only be redeemed if the vehicle and purchaser / lessee match that on the original voucher request form and all other requirements are met. CARB, the Grantee, and HVIP are not responsible for payment of a voucher if the vehicle or purchaser do not match those described on the voucher request form. All vouchers except for transit are required to be redeemed within 18 months of date of voucher request submission. Transit vouchers must be redeemed within 36 months.

CARB, the Grantee, and HVIP are not responsible for payment of a voucher if the vehicle, transaction, and entities involved with the vouchers do not meet the requirements found in this HVIP Implementation Manual. A vehicle must be fully compliant with all provisions and descriptions of the associated Executive Order.

Once a vehicle has been registered at DMV and is ready to be placed into service, the dealer must submit the voucher and required documentation to the Grantee for redemption. All items listed below must be submitted via the online Voucher Processing Center before the voucher can be redeemed. A voucher will only be redeemed if the vehicle and purchaser listed on the voucher match that in the completed purchase transaction. HVIP voucher redemption requests must also meet the following criteria

- a. An HVIP voucher can only be redeemed upon vehicle delivery, final payment to the dealer by the purchaser (less the voucher amount), and registration of the vehicle in California.
- b. For vehicles repowered with engines certified to the optional Low NOx standard of 0.01 g/bhp-hr as of the publication of this Implementation Manual, vouchers may be redeemed when the customer takes delivery of the engines and has paid the balance due (minus voucher amount).
- c. Fleets / purchasers may only request vouchers for those engines that are anticipated to be installed within 90 calendar days of the date of voucher request

- d. A copy of the final complete vehicle invoice (itemized including all taxes) The invoice for the complete vehicle must be signed and dated by the vehicle purchaser / lessee. Invoices must be issued for the purchaser only. Invoices issued to leasing entities or any entities that are not the purchaser will not be accepted for voucher redemption.
- e. The final vehicle invoice must reflect the state sales tax and show that the voucher amount has been fully discounted from the vehicle or engine purchase price. The final vehicle invoice provided for voucher redemption must itemize all complete vehicle charges (e.g., price of the complete vehicle, delivery fee, all applicable taxes, etc.) on a single invoice.
- f. Lease schedule must illustrate that the full value of the voucher was passed down to the lessee, for example through a capital cost reduction. The cost of the vehicle listed on the lease agreement would reflect the voucher discount; payment lease installments would be based on that reduced price.
- g. Invoices for incomplete vehicles or for zero-emission powertrains/drivetrains will not be accepted for voucher redemption.
- h. A copy of the temporary DMV registration or DMV registration for the purchased vehicle must be provided to confirm delivery and purchase specifications. DMV Form REG397 (request for registration) may be submitted in lieu of completed registration; grantee will contact the purchaser within 180 days after voucher redemption to obtain a copy of the completed registration. CARB may approve HVIP vouchers for vehicles that are federally registered in lieu of being registered in California (such as military vehicles) on a case-by-case basis.
- i. The DMV registration must match the vehicle listed on the CARB Executive Order.
- j. A copy or photo of the VIN tag listing the GVWR must be provided to the Grantee to confirm vehicle GVWR. The GVWR on the VIN tag must match the GVWR provided on the voucher request form.
- k. For engines, a copy of the final signed and dated repower invoice containing the VIN and engine serial number must be provided to the Grantee.
- l. The vehicle must have no more than 3,500 miles at time of the vehicle inspection. Vehicles can be used for demos for customer engagement or other purposes before the vehicle is sold, as long as mileage does not exceed 3,500. Proof of vehicle mileage at the time of vehicle DMV registration must be provided by the dealer in the form of a telematics mileage report, DMV odometer disclosure statement, or photo of the odometer upon delivery. Vouchers for vehicles with more than 3,500 miles may be redeemed on a case-by-case basis with CARB's sole approval and with sufficient evidence or explanation justifying such mileage. Not applicable for engine repowers.

- m. Vehicle model year, vehicle model name, chassis, chassis model year, and configuration on redemption paperwork must be in compliance with the corresponding CARB issued Executive Order.
- n. Financial documentation identifying the method and date of final payment from the purchaser to the dealer must be provided to the Grantee prior to voucher redemption. This can be a copied check or transaction showing an electronic money transfer. If lease or financial arrangements involve a third party, they must also be identified with the title or lien-holder clearly indicated. Financial documentation must include an invoice number, VIN, or voucher ID.
- o. Digital inspection photos of the vehicle showing that it is ready to be placed into service must be provided prior to voucher redemption. In instances where vouchers for an order of 10 or more vehicles are being redeemed at the same time, a “group photo” may be uploaded, however a list of the VINs of all pictured vehicles must accompany the photo.
- p. Refuse Only: A digital photo of the front/rear/side loader on solid waste vehicle is required in order to receive the 25% refuse modifier.
- q. A Photo of the Vehicle Emission Control Information (VECI) label for re-certified vehicles and for vehicles with a VIN Model Year that does not match the Model Year on the CARB Executive Order. Only the vehicle VECI label is required.
- r. Delivery Bill of Lading to the purchaser: Must include the origin and destination address, dated driver signatures at pick up and drop off to destination, full VIN and the carrier company information. The destination address must match the address of the Domicile address on file. If a BOL cannot be provided, the dealer must provide an attestation letter signed and dated by the dealer and purchaser that includes:
 - Carrier company and contact info
 - Origin and destination address (address must match domicile location in VPC)
 - Vehicle information including the VIN
 - Inspection notes (optional)
 - Driver signature and date when the vehicle is picked up (optional if attestation letter is provided)
 - Driver and destination/receiving party signature and date when the vehicle is delivered (optional if attestation letter is provided)
- s. Purchaser Labor Laws Compliance Attestation (AB 794): Purchasers of a tractor, panel/step van, straight truck, refuse truck or 2b vehicle must certify compliance with state labor laws at the time of redemption and annually until three years after voucher redemption.
- t. A HVIP Vehicle Inspection Form signed by an HVIP Approved Dealer or Manufacturer must be submitted electronically prior to voucher redemption.

- u. A signed copy of the voucher redemption form must be provided prior to voucher redemption. The Dealer and purchasing fleet must sign electronically.
- v. The dealer must submit all voucher redemption documentation within 60 calendar days of receipt of payment. Failure to provide all the required documentation by this deadline may nullify the voucher. Payment is inclusive of the vehicle itself but does not need to include related items such as vehicle training that the dealer / manufacturer may be providing to the purchaser.
- w. In instances when a batch of vouchers is not redeemed within 540 calendar days of the date of the voucher request (or the date on which the request was moved off a waitlist), a non-fungible redemption schedule may be imposed at CARB's sole discretion, in lieu of cancellation at the 18 month mark. If such a schedule is permitted, vouchers not redeemed in accordance with the schedule will be cancelled on the corresponding dates outlined by the schedule.
- x. All documents that are submitted to the Grantee or its subcontractor for processing voucher redemption must clearly indicate the voucher number or the VIN.

When program funding is available, it is the goal of HVIP to provide payment to the dealership within 7 business days from the time the eligible voucher redemption form and all associated documentation is received by the Grantee. If the voucher payment is delayed beyond 10 business days from the time the eligible voucher redemption form and associated documentation is received, the Grantee will notify the dealership by phone or email at the earliest possible time of such delay.

A vehicle dealer must provide CARB (or its designee) with all requested information related to voucher redemption for compliance with requirements found in this HVIP Implementation Manual within 10 calendar days of CARB's written request for such information. Any vouchers found not in compliance with HVIP requirements or for vehicles not in compliance with the corresponding CARB Executive Order will be cancelled. Dealers are also responsible for replying to all correspondence from CARB, grantee, or inquiries from prospective purchasers within 5 business days.

Dealers and participating fleets that provide false or misleading information may be barred from future participation in CARB incentives and may be subject to enforcement action or other legal remedies at CARB's sole discretion.

It is the Grantee's responsibility to notify the dealer that the voucher request or redemption has been rejected in writing within 5 business days of receipt of signed Terms and Conditions forms or vehicle documentation that disqualifies the vehicle and/or voucher request or redemption. Any rejections will include the reason for a rejected voucher request or redemption.

Vouchers that have been cancelled by the Grantee may be reviewed by CARB at CARB's sole discretion. To request such a review, the dealer must reach out to voucherprocessing@tetrattech.com within 10 calendar days of the date of the cancellation. Only the dealer can request a review. Vouchers cancelled

due to the manufacturer and purchaser caps are not eligible for CARB review. If the only basis for the request for review is that the dealer or purchaser disagrees with the policies set forth in HVIP Terms and Conditions and the Implementation Manual, there is no basis for a review. If a review is underway, updates may be requested monthly by contacting voucherprocessing@tetrattech.com. If vouchers that are the subject of an active CARB Case Review reach their expiration date in the Voucher Processing Center, they will not be cancelled pending the outcome of CARB's review. Note: when a review is requested by the dealer on behalf of the purchaser, new information must be submitted to support the review request, or the vouchers will remain cancelled.

The dealer will discuss infrastructure readiness with the purchaser when the voucher is requested. In instances when a vehicle is ready to be delivered and infrastructure preparedness is delayed such that the purchaser is not ready to accept the vehicle, voucher redemption may be permitted in advance of vehicle delivery at CARB's sole discretion. The dealer will be required to submit a letter to voucherprocessing@tetrattech.com signed by the purchaser attesting that the vehicle is ready to be delivered, but the purchaser is requesting that delivery of the vehicle to their business / fleet be delayed while infrastructure is finalized. The letter must include a new anticipated delivery date. The dealer will be required to update HVIP staff every 3 months as to the infrastructure completion status, and the 3-year operating requirement for the vehicle will begin when the vehicle has been delivered to the purchaser.

5. Vehicle Voucher Amounts and Categories of Funding for FY22-23

All eligible vehicles may receive an HVIP voucher for up to the funding amounts identified in the tables below. Only vehicles domiciled in one of the following areas of the map at <https://webmaps.arb.ca.gov/PriorityPopulations/> are eligible for the Disadvantaged Community voucher enhancement, or any vehicle purchased or leased by a California Native American tribal government (for Tribe eligibility requirements see Section D(2)(f)).

- Disadvantaged Communities = Yellow on map legend
- Disadvantaged AND Low Income Communities = Green (Yellow AND blue on map legend)
- Low Income Communities within ½ mile of a Disadvantaged Community = Crosshatched purple on map legend
- Low Income Households within ½ mile of a Disadvantaged Community = Crosshatched grey on map legend

The Class 8 Fuel Cell plus-up is for vehicles fueled exclusively with hydrogen and not capable of being recharged with electricity.

Available funds are updated regularly at www.californiahvip.org/funding, including any funds still remaining from previous funding years.

Public Transit Bus Set-Aside:

The Public Transit Bus Plus-up funding is reserved for transit buses purchased by a city or county government; a transportation district / transit district; or a public agency. Public transit includes paratransit and microtransit services operated by or on behalf of a public transit agency. When the set-aside funds are fully requested, HVIP will continue to allow standard HVIP voucher requests for all public transit bus fleets subject to funding availability. See more details in Appendix H, which will be published separately from this document.

Innovative Small e-Fleets:

Adding Innovative Small e-Fleets to HVIP allows CARB to implement new and innovative mechanisms including, but not limited to flexible leases, peer to peer truck sharing, truck as a service, assistance with infrastructure, individual owner planning assistance, as well as other mechanisms. ***See more details in Appendix F, which will be published separately from this document. The requirements for this funding differ from standard HVIP. Interested parties can contact isef@californiahvip.org for additional information.***

Public School Bus Set Aside:

This set-aside funding is for California public school bus fleets purchasing zero-emission school buses . ***Details about eligible applicants, scrappage, and other project requirements are in Appendix G. The requirements for this funding differ from standard HVIP.*** HVIP will continue to allow standard HVIP voucher requests for any school buses not eligible for the set-aside, and for all zero-emission school buses if set-aside funding is exhausted, subject to funding availability.

Drayage Truck Set-Aside:

In order to qualify for the Drayage Truck Early Adopter incentive, purchasers must submit a copy of their permission to enter a port or railyard to voucherprocessing@tetrattech.com within 30 calendar days of the voucher request. Acceptable documentation includes Uniform Intermodal Interchange and Facilities Access Agreement UIIA Authorization, concession agreements, or other forms of drayage operations permissions. If Drayage operations are being performed at the Port of Los Angeles, the permissions document must specify this. The \$150,000 voucher amount for drayage truck early adopters will continue through December 31, 2023.

Drayage trucks are defined by CARB regulation Article 4.5, Chapter 1, Division 3, title 13, section 2027, California Code of Regulations as: Any in-use on-road vehicle with a (GVWR) greater than 33,000 pounds that is used for transporting cargo, such as containerized, bulk, or break-bulk goods, that operates on or transgresses through a port or intermodal railyard property for the purpose of loading, unloading or transporting cargo, including transporting empty containers and chassis or off port or intermodal railyard property transporting cargo or empty containers or chassis that originated from or is destined to a port or intermodal railyard property.

Drayage trucks are not: Vehicles operating off of port or intermodal railyard properties that transport cargos that have originated from a port or rail yard property but have been off-loaded from the equipment (e.g., a trailer or container) that transported the cargo from the originating port or rail yard or Vehicles operating off of port or intermodal railyard properties that transport cargos that are destined for a port or rail yard but will be subsequently transferred into or onto different equipment (e.g., a trailer or container) before being delivered to a seaport or intermodal railyard.

Additional drayage truck funds: HVIP is administering funds for drayage vouchers on behalf of the Port of Los Angeles, generated from the Clean Truck Fund, which is a fee imposed on loaded trucks entering or leaving container terminals (<https://www.lamayor.org/mayor-garcetti-announces-start-clean-truck-fund-san-pedro-bay-ports>). Purchasers receiving these funds for drayage trucks via HVIP must commit to a minimum number of annual trips to the ports. Additional information is included in the Voucher Request Form for relevant requests. Information is at www.californiahvip.org/funding.

Zero-Emission Vehicle (ZEV) Voucher Table

Vehicle Weight Class	Base Vehicle Incentive
Class 2b	\$7,500
Class 3	\$45,000
Class 4-5	\$60,000
Class 6-7	\$85,000
Class 8	\$120,000
ZEV Voucher Modifiers (plus-ups and deductions from base)	
Class 8 Drayage Truck	+25%
Refuse Truck *	+25%
Disadvantaged Community For vehicles domiciled in a disadvantaged community that are purchased or leased by any public or private small fleet with 10 or fewer trucks or buses, and less than \$50 million in annual revenue for private fleets, or for any purchase or lease by a California Native American tribal government. There is no revenue provision for public fleets.	+15%

Class 8 Fuel Cell	+100%
Public Transit Agencies	+15%
School Buses for Public School Districts (unless part of the Public School Bus Set Aside; see Appendix G for set-aside voucher amounts)	+65%
Plug-in Hybrid (>35 mi AER)	-50%
In-Use Converted/Remanufactured	-50%

* For the purposes of HVIP, vehicles eligible for the 25% Refuse Voucher Enhancement must:

1. Be HVIP eligible;
2. Collect garbage as a front load, rear load, side load, or other form of garbage packer truck¹²; and
3. Not be a roll-off or other form of waste transfer vehicle.

Note: Drayage and refuse enhancements are available until December 31, 2023.

The Innovative Small E-Fleets program and the Public School Bus Set Aside have differing voucher amounts and cannot be combined with other HVIP categories, unless otherwise specified; see Appendices F and G at www.californiahvip.org/im.

The Plug-in Hybrid and In-Use Converted/Remanufacturer voucher modifiers (in the above Zero-Emission Vehicle (ZEV) Voucher Table) are applied first and establish the new base voucher amounts that any other voucher adjustments or modifiers are applied to.

For a zero-emission vehicle conversion voucher, the dealer may sell a powertrain/drivetrain installed in a vehicle identified at the time of voucher request. The dealer is prohibited from requesting a voucher for a transaction involving only the powertrain/drivetrain without installation of the powertrain/drivetrain into a vehicle identified at the time of voucher request.

Eligible ePTO Voucher Amounts

Energy Storage Capacity	Base Vehicle Incentive ¹
3 – 10 kWh	\$20,000

¹² <https://ww2.arb.ca.gov/resources/fact-sheets/swcv-garbage-roll-and-garbage-packer-requirements#:~:text=%E2%80%9CGarbage%20packer%E2%80%9D%20means%20a%20vehicle,and%20semi%20automated%20side%20loaders>.

>10 - 15 kWh	\$30,000
> 15 - 25 kWh	\$40,000
> 25 kWh	\$50,000

¹ePTO funding amounts may cover up to 65 percent of the incremental cost of the ePTO vehicle, not to exceed the funding levels listed in this table.

6. Disadvantaged Communities Voucher Enhancements

In 2014, the California Environmental Protection Agency (Cal/EPA) identified disadvantaged communities (DAC) for the purposes of SB 535 using the California Communities Environmental Health Screening Tool (CalEnviroScreen 2.0). In 2017, Cal/EPA updated the list of disadvantaged communities based on the newer CalEnviroScreen 3.0 model and identified low-income communities for the purposes of implementing AB 1550. CARB will use CalEnviroScreen 4, or latest version, based list of disadvantaged communities and the new low-income communities to determine compliance with AB 1550 requirements. More information on the CalEnviroScreen model and disadvantaged communities is available on Cal/EPA’s website¹³.

To ensure that HVIP continues to meet its goal of providing funding in disadvantaged communities, and to satisfy AB 1550 requirements, a set aside of HVIP funding might be needed. Throughout the project year, if data shows that HVIP is not meeting AB 1550 goals, funding will be earmarked for vehicles located in disadvantaged communities. As part of the reporting requirements associated with Low Carbon Transportation funding, CARB will track where these funds are spent so the portion that is spent in disadvantaged and low income communities can be calculated and reported in future annual reports to the Legislature.

Dealers are responsible for indicating DAC eligibility on the voucher request form, and the grantee will verify to ensure the DAC incentive is applied to all eligible vouchers.

Voucher enhancements will be applied for domicile addresses that fall within the following areas of the mapping tool at <https://webmaps.arb.ca.gov/PriorityPopulations/>

- Disadvantaged Communities = Yellow on map legend
- Disadvantaged AND Low Income Communities = Green (Yellow AND blue on map legend)
- Low Income Communities within ½ mile of a Disadvantaged Community = Crosshatched purple on map legend
- Low Income Households within ½ mile of a Disadvantaged Community = Crosshatched grey on map legend

¹³ <http://www.calepa.ca.gov/EnvJustice/GHGInvest/>

The DAC incentive is 15% and is only available for vehicles domiciled in an eligible area of the mapping tool that are purchased or leased by any public or private small fleet with 10 or fewer trucks or buses, and less than \$50 million in annual revenue for private fleets -- or for any purchase or lease by a California Native American tribal government [more on tribal government application requirements in Section D(2)(f)]. The revenue provision includes all revenues from subsidiaries, subdivisions, or branches. There is no revenue provision for public fleets.

A small fleet is defined as any entity that has 10 or fewer vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California. Unredeemed HVIP vouchers do count toward this total. For example a fleet with 8 vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California that also has 4 existing unredeemed voucher requests does not qualify as a small fleet in HVIP. Any entity requesting more than 10 HVIP vouchers also does not qualify as a small fleet in HVIP.

7. Maximum Allowable Voucher Amount

For privately owned vehicles, the total voucher amount including HVIP Base Vehicle Incentive plus voucher enhancements, plus all other eligible public incentives – or other discretionary public funding such as grants -- may not exceed 90 percent of the total vehicle cost (excluding taxes and fees). For publicly owned vehicles, including public school buses, public transit buses, and municipal vehicles, the sum of HVIP and other eligible public funding may not exceed the full vehicle cost excluding taxes and fees. Utilities that are investor-owned are not public entities.

Vouchers exceeding the above limits will be adjusted to the maximum allowable voucher amounts. HVIP funding may not pay for any taxes or fees. Taxes and fees must be paid for by the fleet or another funding source. The total vehicle cost is to be determined by CARB in consultation with the vehicle manufacturer, based upon the vehicle invoice sale price, typical industry standard costs for that vehicle technology and type, and other factors. In addition, HVIP voucher amounts for plug-in hybrid heavy-duty vehicles, as well as vehicles equipped with ePTO may not exceed 65 percent of the incremental cost of the hybrid vehicle or ePTO system, not to exceed the funding levels listed in the Voucher Tables in this document.

HVIP vouchers for zero-emission vehicles are not restricted to vehicle incremental cost, in order to help accelerate the market for this more advanced and costly vehicle technology.

8. Combining with Other Funding Sources

HVIP vouchers may be combined or “stacked” with other eligible public incentives, where applicable, to further support fleet purchase decisions. HVIP’s intent is to substantially offset the cost of new technology, without exceeding the amount of public funding needed to influence a purchase decision.

To stack eligible public incentives, the dealer and purchaser must ensure that all of HVIP's and respective public incentive program's requirements and policies regarding the stacking of public funds are met. Local- and federal-funded incentives may be combined with HVIP vouchers, so long as each incentive program is not paying for the same incremental costs or the total sum of incentives does not exceed the total cost of the vehicle.

Local incentives that may be combined with HVIP include programs administered by local air districts or local municipalities that are locally funded. AB 923 funds administered by local air districts may also be combined with HVIP for school buses only. Examples of programs funded by local air districts and not the State that may be stacked with HVIP include, but are not limited to, the following:

- Sacramento Metropolitan AQMD's Sacramento Emergency Clean Air & Transportation (SECAT) Grant Program
- South Coast AQMD's Mobile Source Air Pollution Reduction Review Committee (MSRC) grants
- Bay Area AQMD's Mobile Source Incentive Fund and Transportation Fund for Clean Air
- San Joaquin Valley Air Pollution Control District's Heavy-Duty Truck Replacement Program

Federal incentives may be combined with HVIP vouchers, including funding provided by the Federal Transit Administration (FTA), the Department of Energy (DOE), U.S. Environmental Protection Agency (EPA), and other federal agencies.

For fleets with more than 10 vehicles, stacking HVIP with State-funded incentives is not allowed, with the exception of public transit buses.

Small fleet stacking:

Small fleets of 10 or fewer vehicles can stack with state incentive programs, so long as the other program allows stacking, each incentive program is not paying for the same incremental cost, and the non-HVIP incentive program is not required to generate greenhouse gas emission reductions. Programs that can now be stacked with HVIP for small fleets ONLY include but are not limited to:

- CARB Truck Loan Assistance Program
- Goods Movement Emission Reduction Program (Prop 1B Program)

Transit stacking:

Transit buses operated by or on behalf of a city or county government; a transportation district / transit district; or a public agency, including paratransit and microtransit services, may stack State-funded incentives with HVIP, with the provision that HVIP will only fund the remaining cost up to the maximum voucher amount after the other incentives have been applied at their maximum allowable amounts. Examples of State programs that can stack for transit:

- Transit and Intercity Rail Capital Program (TIRCP)
Low Carbon Transit Operations Program (LCTOP)HVIP may fund or co-fund vehicles that are part of CARB’s Clean Mobility Options (CMO) program, at CARB’s sole discretion. Please contact info@californiahvip.org for more information.

Other stacking:

- The Carl Moyer Memorial Air Quality Standards Attainment Program may be stacked for small fleets scrapping and replacing their heavy-duty trucks through the On-Road Heavy-Duty Voucher Incentive Program AND through Moyer Chapter 4: On-Road Heavy-Duty Vehicles for transit, but not for other vehicle types.
- The Volkswagen Environmental Mitigation Trust (VW) may be stacked with HVIP for Zero-Emission Class 8 Port and Drayage Trucks as well as Transit, School, and Shuttle Buses greater than 14,000 pounds GVWR.

Additional programs may be stacked with HVIP with CARB’s approval, by contacting voucherprocessing@tetrattech.com. It is the responsibility of the Purchaser to ensure the other programs can be stacked with HVIP. Vouchers where HVIP is stacked with incompatible programs will be cancelled.

Prohibited from stacking:

State-funded incentive programs that MAY NOT be combined with HVIP for any vehicle types include:

- Low Carbon Transportation Investments

9. Example Calculations

This section provides example calculations of the maximum allowable HVIP voucher amount, based upon assumptions regarding other potential funding sources. These examples are for illustrative purposes only. The actual maximum voucher amount will depend upon each specific circumstance.

EXAMPLE 1: A local air district grant provides \$100,000 to a private fleet to replace an old truck with a new \$140,000 diesel truck of 35,000 lbs GVWR. HVIP augments this grant by providing a \$150,000 voucher for the purchaser to upgrade to a \$300,000 zero-emission truck. The zero-emission truck incremental cost is \$160,000. HVIP voucher amount combined with the air district funding cannot exceed 90 percent of the zero-emission vehicle purchase cost (excluding taxes and fees). HVIP funding may not pay for any taxes or fees. Taxes and fees must be paid for by another funding source.

In this case, \$150,000 HVIP voucher < \$160,000 vehicle incremental cost

\$100,000 district grant + \$150,000 HVIP voucher = \$250,000

$\$300,000 * 90 \text{ percent} = \$270,000$

$\$250,000 \text{ total public funds} < 270,000$

The transaction can proceed without discounting HVIP voucher.

EXAMPLE 2: Transit agencies receive an 80 percent grant from the FTA for most new vehicle purchases, including new zero-emission vehicle purchases. For example, suppose a public transit agency receives a \$640,000 FTA grant towards the purchase of a new \$800,000 battery-electric zero-emission transit bus of 45,000 lbs. GVWR. The transit agency also receives \$20,000 in Congestion Mitigation and Air Quality (CMAQ) funding for the bus. In this example, the transit fleet is also receiving \$100,000 from CalSTA's Transit and Intercity Rail Capital Program (TIRCP). Since it is a zero-emission public transit bus, the sum of HVIP voucher and all other public incentives may not exceed the full vehicle cost and funding from other state incentive programs may be combined. Therefore, the maximum allowable HVIP voucher could not exceed \$40,000 as HVIP vouchers may be applied after all other funding sources have been accounted for.

$\$640,000 \text{ FTA Grant} + \$20,000 \text{ CMAQ Funding} + \$100,000 \text{ TIRCP Funding}$

$= \$760,000 \text{ Other Public Incentive Funds}$

HVIP voucher cannot exceed \$40,000

The maximum allowable voucher amount may not exceed \$40,000 since the sum of all public incentives cannot exceed the full vehicle cost. The HVIP voucher will be discounted to \$40,000.

EXAMPLE 3: A private fleet with 150 existing trucks would like to purchase one Class 8 battery-electric truck (\$120,000) that will be used for drayage operations. The voucher base adjustments will be applied first and will compound with other modifiers; therefore the -20 percent voucher base adjustment gets applied to the \$120,000 voucher amount totaling \$96,000. Adding the sum of its modifier ($\$96,000 * 25 \text{ percent} = \$24,000$), the full incentive amount for the private fleet is \$120,000.

EXAMPLE 4: A private fleet with currently one truck would like to purchase two Class 8 hydrogen fuel cell trucks (\$120,000) that will be used for drayage operation. The vehicles will be domiciled in a Disadvantaged Community. The voucher base adjustments will be applied first and will compound with other modifiers; therefore the +15 percent voucher base adjustment (Public or Private fleets with 10 or fewer vehicles above 8,500 lbs.) gets applied to the \$120,000 voucher amount totaling \$138,000. Adding the sum of its modifiers; Class 8 Drayage Truck Early Adopter ($\$138,000 * 25 \text{ percent} = \$34,500$), Disadvantaged Community ($\$138,000 * 15 \text{ percent} = \$20,700$), and Class 8 Fuel Cell ($\$138,000 * 100 \text{ percent} = \$138,000$), the full incentive amount for the private fleet is \$331,200.

10. Funding Shortfall Provisions

Randomization:

If standard HVIP is closed to new voucher requests due to oversubscription of funds, a randomization process may be used to manage demand when HVIP reopens.

Specifically, for the first 24 hours when the online Voucher Processing Center is open to new voucher requests (until 9:59 a.m. Pacific on the day after opening day), the submitted requests will not be assigned a status of funded OR unfunded. If the cumulative dollar value of all requests received during the first 24 hours is **lower** than the amount of available funds, funds will be assigned in the order the requests were received, based on the timestamp. If a batch is requested, funding will be assigned for all requests in the batch (as long as funds are available).

Duplicate voucher requests will be removed before funds are assigned. Duplicates are defined as two voucher requests, or two separate batches of voucher requests, for the same purchaser, vehicle, and vehicle domicile location. If two or more duplicate batches of different quantities are submitted, the smaller will be deleted.

After funding has been set aside, the initial review of the voucher will commence as specified in this Implementation Manual. After the first 24 hours that HVIP is open, the amount of funding requested to date will be posted on the HVIP website and any additional voucher requests submitted thereafter will be assigned funds in the order they are received based on timestamp.

If the dollar value of all requests received during the first 24 hours is **greater** than the amount of available funds, funding will be assigned using a randomization process.

Specifically, requests will be assigned their place in the queue for funding using a random-number generator, with the caveat that requests for vehicles domiciled in a DAC will be assigned funded status before the remaining voucher requests, as will any requests for vehicles purchased / leased by a California Native American Tribal Government. Purchasers do not need to meet all qualifications for the DAC plus-up as defined in this Implementation Manual in order to be allocated prioritization, as long as the vehicle is domiciled within a DAC or purchased / leased by a tribal entity. The OEM rolling voucher soft cap will not be enforced before randomization.

If requests for DACs / tribal entities made in the first 24 hours do not exceed available funds, voucher requests for DACs / tribal entities will be assigned funding in the order they were received based on timestamp, and all remaining requests that had been received during the initial 24 hours will be randomized as described below as needed based on demand. If requests for DACs / tribal entities made in the first 24 hours exceed available funds, these requests will be randomized first and all other requests will be randomized separately and remain on a contingency list as described below.

The process of applying the randomization will be conducted by the Grantee and witnessed by CARB staff. The process will be video recorded and the recording will be available upon request by contacting voucherprocessing@tetrattech.com. Any batch of requests-- which includes more than one vehicle request with the same purchaser, vehicle, and domicile submitted together or individually-- will be assigned one "group" number for randomization, not multiple numbers for each vehicle in the batch, and all vouchers in the batch will receive funding according to that position in the queue.

Any requests not allocated funding via the randomization process will then remain on a contingency list for 90 calendar days after the date that funding status is announced. They will be assigned funds -- in the order of their randomly-assigned number designating their place in the queue for funding -- if any requests are cancelled during the initial review period. At the end of 90 calendar days the remaining unfunded contingency list will be cancelled.

Note: If randomization is needed due to demand, funds for standard HVIP, transit set-aside funds, Public School Bus Set Aside and drayage set-aside funds, as referenced in this Implementation Manual, will be assigned within their own cohort. Innovative Small E-Fleet funds will not be randomized. See Appendices F-G for details on these set-asides.

Reserve for Medium and Small Private Fleets and Public Fleets:

Reserve: Starting January 1, 2023, 70% of Standard and Drayage funds for FY22-23 are reserved for private fleets with 100 vehicles or fewer, and for public entities. If more than \$100 million remains in the reserve on July 1, 2023¹⁴, then 30% of remaining funds will be made available to fleets with 100 or more vehicles. If any funds remain on November 1, 2023, the remainder of the reserve will be available to fleets of any size.

Waitlist: When available voucher funding is fully subscribed, CARB has sole discretion to permit a waitlist, and only if adequate funding will be available in the following budget cycle to cover a waitlist. Waitlisted voucher requests will be submitted to the Grantee following existing voucher processing procedures.

When funding is available, waitlisted voucher requests will be reviewed in the order they were received by the Voucher Processing Center. If CARB provides case-by-case approval for any dealers / manufacturer to deliver a waitlisted vehicle during the waitlist period, any such voucher requests will be reviewed first when funding is available.

Requests are subject to the Implementation Manual and the Terms and Conditions that are in place at the time they are converted to funded vouchers, not the version in place at the time the waitlist request is initially made (if different).

If a waitlist request is made in a different calendar year than the calendar year in which it is converted to funded status, the fleet cap applies to the year in which it is converted to funded status. For example, if a fleet places a waitlisted request for 20 delivery vans in 2023 and the request moves off the waitlist and is funded in 2024, the fleet has 20 vehicles toward its 30-voucher cap for 2024.

¹⁴ <https://californiahvip.org/funding-updates/hvip-funds-remain-available/>

All waitlisted voucher requests for vehicles that will be leased require a lessee to be named on the request. All waitlisted voucher requests must include a vehicle model year that is included in the HVIP Eligible Vehicle Catalog.

If a waitlist is only kept for a pre-specified amount of time in order to fill in for cancellations, it is referred to as a contingency list, and its use will be specified in advance (i.e., the 90-day contingency list in the Randomization section above).

Manufacturer Transfer: In instances when HVIP is oversubscribed and a purchaser is initiating a voucher cancellation due to manufacturer's production capacity, meaning the vehicle cannot be produced in the 540-day voucher timeline, transferring the vouchers to another manufacturer may be permitted at CARB's sole discretion. In instances when HVIP is not oversubscribed, a purchaser requesting a manufacturer transfer should reach out to voucherprocessing@tetrattech.com requesting cancellation of the original voucher(s), and the new dealer can then request a new voucher(s).

D. DUTIES AND REQUIREMENTS

1. Vehicle Dealers

a. ELIGIBLE PARTICIPANTS

Truck and bus dealers play a central role in HVIP's success. The Grantee will work with CARB to develop/maintain a list of dealers eligible to participate in HVIP, and to receive a written commitment from these dealers to comply with all applicable project requirements. The eligible dealer list will be used to streamline project access while ensuring project transparency and accountability. The following entities may be considered eligible vehicle dealer entities for the purposes of HVIP:

- i. A truck or bus dealership that has had a valid business license for the past two years, has an official dealer license and has a written agreement with a medium- or heavy-duty vehicle manufacturer.
- ii. A truck, van or bus vehicle manufacturer that manufactures HVIP eligible vehicles and sells those vehicles directly to fleets.
- iii. A truck, bus or equipment manufacturer that has a written agreement with another medium- or heavy-duty vehicle manufacturer that has had a valid business license for the past two years and an official dealer license.
- iv. A manufacturer that manufactures engines certified to the optional Low NOx standard of 0.01 g/bhp-hr, or dealer in possession of an official dealer license and selling such engines. A truck, van or bus manufacturer or dealer that converts an existing vehicle and

has had a valid business license for the past two years and either has an official dealer license OR automotive repair dealer license.

The HVIP Approved Dealer is defined as the vendor of the completed vehicle or vendor that sells and installs engines in existing vehicles, and not the vendor of the vehicle chassis. **An HVIP Approved Dealer must be the individual responsible for the final invoice to the purchasing fleet (itemized and including taxes) AND delivery of the completed vehicle.**

Approved dealers must provide an authorization letter verifying that they are authorized to sell a manufacturer's technologies. A copy of email correspondence with the manufacturer stating that a specific dealership is authorized to sell specific vehicles from the HVIP vehicle catalog is sufficient. Manufacturers who are also acting as dealers are exempt from the requirement to submit this letter. For the purposes of HVIP, an HVIP Approved Dealer may be considered a dealership or OEM salesperson, grant manager, financial controller, or similar role. Those individuals are responsible for requesting and redeeming vouchers for a vehicle they are approved to sell according to the HVIP Eligible Vehicle Catalog (californiaHVIP.org). An entire dealership (or manufacturing organization) is not entitled to request HVIP vouchers when it employs an HVIP-approved dealer. Rather, an individual at the dealership is responsible for becoming an approved HVIP dealer if they wish to request their own vouchers. Each separate office location of a dealership or manufacturing organization is limited to 3 individual VPC accounts. Sharing VPC accounts with unauthorized users and a VPC account used by multiple individuals are prohibited. Manufacturers or other affiliated parties who are not authorized dealers do not have access to the VPC and can request voucher status information directly from the dealer who submitted the voucher request.

Once a voucher request is submitted, the dealer, vehicle, and fleet information, cannot change. Therefore, vouchers and/or voucher requests cannot be transferred from one HVIP approved dealer's VPC account to another. In the event where an approved dealer no longer works for the dealership and there is addition approved dealer(s) who has been an HVIP approved dealer(s) for less than one year, a 1–2-page Voucher Transition Plan summarizing voucher nuances, causes for delivery delays, case-by-case exceptions, etc. is required from the owner of the vouchers prior to their departure. If the dealership employees an HVIP approved dealer(s) who has participated in HVIP continuously for over one year, a Voucher Transition Plan may be exempt. If a voucher transfer from one approved dealer to another is necessitated, requests should be made no more than once per quarter, by contacting dealertraining@californiahvip.org

A dealership, manufacturer, or leasing entity is not a purchaser. A purchaser with active vouchers may not become an HVIP approved dealer. Dealerships, leasing entities, vehicle rental providers, manufacturers, and any entities under common ownership or control with such establishments are prohibited from requesting a voucher as a purchaser. Entities, including entities under common ownership or control, that have been identified as a dealership, leasing entity, or manufacturer in past HVIP transactions are prohibited from requesting new vouchers as a purchaser.

If a dealership or manufacturer entity has at least one active HVIP dealer, requests to add more are limited to once per quarter (Jan-March, April-June, July-Sept, Oct-Dec). Exceptions can be granted by

contacting dealertraining@californiahvip.org Upon CARB case-by-case approval, a vehicle manufacturer or dealer may request no more than 10 vouchers in any 12 month period for their own use. This applies to vehicles the manufacturer produces, vehicles the dealer makes available for sale, demonstration vehicles, and vehicles to be made available for short-term customer use.

Vehicle manufacturers and dealers will be required to provide CARB additional information including, but not limited to, intended use of vehicle, manufacturing costs and dealer invoice or acquisition costs.

The vehicle may have no more than 3,500 miles on the odometer at the time of voucher request and cannot be registered. If a vehicle manufacturer or dealer chooses to purchase a vehicle they do not produce or sell, then this condition will not apply.

Each HVIP-funded vehicle purchased for the manufacturer or dealer's own use must participate in one HVIP-affiliated vehicle showcase or ride-and-drive event per calendar year. More information will be provided at the time of voucher request.

b. HVIP APPROVED DEALER RESPONSIBILITIES

The Grantee will work with vehicle manufacturers to maintain a list of dealers authorized to receive HVIP vouchers. Dealer responsibilities include:

- i. Familiarity with all HVIP requirements.
- ii. Participation in dealer training and registration.
- iii. Providing accurate information to the vehicle purchasing fleet, the Grantee, and CARB and replying to all inquiries – including those from prospective purchasers -- within 5 business days .
- iv. Completing voucher request and voucher redemption forms, with the assistance of the vehicle purchasing fleet, and in supplying the necessary vehicle purchase documentation.
- v. Ensuring access to the correct vehicles in the VPC by checking the HVIP Eligible Vehicle Catalog (CaliforniaHVIP.org) and notifying the Grantee if it appears inaccurate.
- vi. Issuing the final vehicle invoice to the purchaser and delivering the completed vehicle to the designated domicile location.
 - a. Invoices must show the HVIP voucher amount being provided to the purchaser to discount the purchase or lease of the vehicle.
- vii. Holding a current and valid dealer license that permits selling vehicles within California.
Note: If a dealer is located outside of California, tax reflected on the invoice should still be based on the vehicle's California domicile location.
- viii. Providing accurate and complete documentation of the vehicle purchase to the Grantee.
- ix. Providing reasonable assistance to CARB or its designee to obtain updated purchaser/fleet information, inspect vehicles, and review HVIP related records during the first three years after vehicle receipt and final payment by the purchasing fleet, whichever is later.

- x. Adhering to all rules and requirements of the California Department of Motor Vehicles (DMV) at the point of applying to become an HVIP Approved Dealer and while maintaining status as an approved dealer.
- xi. Frequently checking the HVIP webpage at CaliforniaHVIP.org for updates and announcements.

HVIP is intended to lower the vehicle price for purchasers by the full voucher amount. Vehicle dealers must deduct the full voucher amount from the vehicle purchase price to be eligible for a voucher. Sales tax for the vehicle purchase shall be based upon the pre-voucher cost of the vehicle. The invoices provided by the dealer as proof of purchase for voucher redemption must itemize all vehicle charges (e.g., price of the vehicle, delivery fee, all applicable taxes, etc.) and must show the deduction of the voucher amount from the purchase price for the purchaser. Voucher requests and redemptions in which the voucher amount is deducted from the purchase price for entities other than the purchaser, such as the leasing company, are prohibited and the vouchers will be cancelled. Private fleets accessing loan financing toward the HVIP-funded vehicle must provide proof of a down payment that is at least as much as the voucher amount. Dealers and purchasing fleet are required to disclose other sources of public funding. Voucher requests cannot list the dealer or the leasing entity as the purchaser or lessee.

Upon CARB case-by-case approval and only when necessary to support the goals of HVIP, vouchers may be reimbursed directly to the purchasing fleet. The fleet will be required to provide CARB additional information including, but not limited to, a signed letter in which they state this request and confirm their understanding that this is a departure from standard HVIP procedure, and a copy of a paid invoice showing the voucher amount was paid to the dealer.

The voucher request form and voucher redemption form both are legally binding and enforceable agreements to meet the requirements of the project. The dealer is responsible for ensuring the accuracy of the vehicle and dealership information on all voucher request or redemption forms submitted to the Grantee. Submission of false information on any of these forms may result in cancellation of the voucher, recapture of funds, and removal from the dealer list. In addition, CARB may seek other remedies available under law.

Participating dealers must keep written records of sales transactions for vehicles funded with an HVIP voucher – including but not limited to the vehicle invoice and proof of purchase -- for three years after the vehicle receipt and final payment by the fleet, whichever is later. A vehicle dealer must provide CARB (or its designee) with all requested information related to compliance with HVIP requirements or any vehicle(s) purchased with a HVIP voucher within 10 calendar days of CARB's written request for such information. Requested information may include but is not limited to purchase orders or agreements and vehicle payment information and related bank records.

A dealer with no voucher activity for more than 365 days may be deactivated from the VPC. Reactivation may require additional dealer training. All dealers associated with unredeemed vouchers (voucher owner) are required to keep their VPC account active, including any required training. This also applies where account sharing is enabled.

Dealers that submit false information to the Grantee or inflate the price of a funded vehicle may be required to return the full voucher amount to the Grantee or CARB, and may be excluded from future participation in HVIP. In addition, CARB may seek other remedies available under law.

Dealer or manufacturer violations of any parameter of the IM may result in CARB barring or limiting the number of new voucher requests that can be placed by that dealer or manufacturer, and by any other dealers from an affiliated dealership. The length of the restriction is at CARB's sole discretion and can be up to 365 calendar days.

2. Vehicle Purchaser

a. PURCHASER RESPONSIBILITIES

The purchaser is responsible for participating in the preparation of voucher request and redemption forms with the dealer and for paying the non-voucher portion of the vehicle cost. To receive an HVIP voucher:

The purchaser must be a business, non-profit, or government entity which is based in California or has a California-based affiliate. Vehicles for personal use are not eligible for HVIP funding.

- i. If a private entity, the purchaser must be registered with the California Secretary of State. CARB or its designee may utilize the California Secretary of State Business Search portal (<https://businesssearch.sos.ca.gov/>) to determine whether a private-entity purchaser is eligible for HVIP funding.
- ii. Non-profits must provide an IRS Determination Letter at the point of voucher request.
- iii. A tax identification number (TIN) must be provided from the purchaser at the point of voucher request.
- iv. Businesses that are not registered with the California Secretary of State or unable to provide a TIN or SSN are not eligible for HVIP
- v. Businesses not listed on the Secretary of State portal that believe they are valid HVIP-eligible purchasers as defined by this manual may submit a letter describing why they are not listed to voucherprocessing@tetrattech.com at the time of the voucher request for consideration by CARB, and a copy of a tax filing may be required

A purchaser for the purposes of HVIP is the fleet or individual owner / operator who will operate the vehicle for a minimum of three years after voucher redemption, whether through lease or direct purchase. A purchaser is not a manufacturer, dealership, leasing company, or any entity that enters into any agreement with another party to operate the vehicle. Dealerships, leasing entities, vehicle rental providers, manufacturers, and any entities under common ownership or control with such establishments are prohibited from requesting a voucher as a purchaser. Entities, including entities under common ownership or control that have been identified as a dealership, leasing entity, or manufacturer in HVIP transactions beginning January 1, 2022 are prohibited from requesting new vouchers as a purchaser.

A residential address may NOT be used as a vehicle domicile location unless specifically approved by CARB. Purchasers intending to use a residential address as a vehicle domicile location must provide a letter of explanation as to the commercial use of the residential property to voucherprocessing@tetrattech.com at the time of voucher request, or the voucher will be cancelled. The letter must explain the infrastructure and parking parameters that support the vehicles identified in the voucher request at the residential location that make it suitable for commercial use, the number of commercial vehicles domiciled on the site, and the date that commercial vehicle activity started at the site. The letter also must include a copy of the purchaser's charging policy and strategy showing plug-in access for all HVIP-funded vehicles domiciled at the site. The purchaser must be able to demonstrate reasonable access to necessary charging/fueling equipment at the domicile location located in California and parking capability to support all the vehicles identified in the voucher request.

Purchasers must be in compliance with the California Truck and Bus Regulation (TRUCRS). Fleets are encouraged to have their TRUCRS Compliance Certificate renewed at the start of each calendar year to facilitate timely compliance checks. Out-of-compliance fleets and businesses are not eligible for HVIP incentives and vouchers for fleets found to be out of compliance with any regulation cannot be redeemed or funds may be recaptured. If a purchaser is not in compliance with TRUCR 365 days after a voucher is requested, the voucher will be cancelled. Lessees are not permitted to use the lessor's TRUCR ID; they must have their own TRUCR ID, unless their lease agreement states that the lessor is responsible for maintenance and compliance. Purchaser is also responsible to have certified their compliance with California state labor laws (AB 794) annually until three years after voucher redemption.

Purchasers must maintain insurance as required by law. If the purchased vehicle is destroyed or otherwise permanently inoperable due to a crash or for any other reason, the vehicle purchaser must notify the Grantee. The notification must provide proof that the specific funded vehicle has become inoperable, including photographs of the inoperable vehicle with license plates or other identifying markings, as well as any applicable insurance or police documentation. CARB may not claw funding back from a purchaser if the vehicle becomes non-operational due to damage not found to be intentional or due to negligence or fraudulent activity by the purchaser.

The purchaser must commit to operate the vehicle in California for at least three years after the voucher redemption date. Vehicles registered in a California county that borders another state or Mexico and emergency response vehicles may accrue up to 25 percent of their mileage each year for the three-year reporting period outside of California, without prior approval. Class 8 trucks, including port drayage trucks, may accrue up to 50 percent of their mileage each year outside of California without prior approval, as long as goods are being transported to or from California. Vehicles that are registered via the California DMV's International Registration Plan may also accrue up to 50 percent of their mileage each year outside of California without prior approval. All other vehicles must operate 100 percent within California for at least three years. Mileage is verified via telematics reporting by the manufacturer.

Purchasers must not make or allow any modifications to the vehicle's emissions control systems, hardware, software calibrations, or hybrid system (Vehicle Code Section 27156).

Purchasers must submit annual surveys for three years following voucher redemption. Surveys will be provided by CARB or Grantee for completion by the vehicle purchaser. Fleets and businesses that systematically fail to submit accurate and timely surveys/questionnaires may be prohibited from future HVIP and other incentive participation.

Purchasers must agree to Telematics requirements specified in Section B(1)(l), except vehicles equipped with engines certified to the optional Low NOx standard of 0.01 g/bhp-hr as of the publication of this document.

Purchasers must allow CARB, the Grantee, or their designee to verify the vehicle registration with the DMV. The DMV registration must match the vehicle listed on the CARB Executive Order.

Purchasers must be available for follow-up inspection if requested by the Grantee, CARB, or CARB's designee.

Military vehicles are not subject to some conditions (see Terms and Conditions Appendix).

Purchasers must disclose all sources of public funding used in combination with HVIP funds.

The purchaser is responsible for ensuring the accuracy of the vehicle, engine and purchaser information on the voucher request and redemption forms. Submission of false information on either of these forms may be considered a criminal offense and is punishable under penalty of perjury under the laws of the State of California.

If a batch of more than 5 vouchers is requested, and the batch represents the fleet's first vehicles domiciled in California, the fleet must submit a letter to voucherprocessing@tetrattech.com within 30 calendar days of the voucher request, explaining the operations that are anticipated for these vehicles for the first year after vehicle delivery.

Purchasers must keep written records of the vehicle purchase for vehicles funded with an HVIP voucher – including the vehicle invoice, proof of purchase, and DMV records – for three years after the vehicle purchase transaction. A vehicle purchaser must provide CARB (or its designee) with all requested information related to any vehicle purchased with an HVIP voucher within 10 calendar days of CARB's written request for such information. Requested information may include but is not limited to purchase orders or agreements, vehicle payment information and related bank records, and purchaser fleet information. Vehicle or engine purchasers that submit false information to the Grantee or CARB may be required to return the full voucher amount to the Grantee or CARB and may be excluded from future participation in HVIP. In addition, CARB may pursue other remedies available under the law.

b. RESALE OF VEHICLES

Purchasers participating in HVIP are expected to keep the vehicle and meet all applicable project requirements for a minimum three-year period after the date of voucher redemption. However, resale of a vehicle may be allowed within this three-year period if necessitated by unforeseen or unavoidable circumstances. Resale of an HVIP funded vehicle must receive CARB written approval **prior to resale**; the name, phone number, and email address of the prospective new purchasing organization must be provided to voucherprocessing@tetrattech.com before the sale. At that time, a copy of the current

Purchaser Terms and Conditions Form will be provided to the prospective new vehicle purchaser to review before the sale. If written approval to resell the vehicle is provided by CARB, the original vehicle purchaser must provide documentation of the transaction to voucherprocessing@tetrattech.com as proof that the original voucher amount was passed on to the new purchaser. A vehicle purchased with an HVIP voucher may not be resold more than once within three years of the voucher redemption date. Any resale request is required to comply with the IM in effect at the time of the resale request.

For vehicles resold within three years of the voucher redemption date (and after CARB provides written approval), the original vehicle purchaser must provide the new purchaser of applicable voucher project requirements. The new vehicle purchaser must meet all HVIP eligibility requirements and agree in writing to meet all applicable program requirements found in the IM in effect at the time of the resale request. The new vehicle purchaser is prohibited from entering into an agreement with another party to operate the vehicle including, but not limited to, vehicle rentals, vehicle subscription services, vehicle sharing platforms, and fleet-as-a-service models.

If the vehicle is moved out of the State, resold to an entity that enters into an agreement with another party to operate the vehicle, resold to a purchaser that is ineligible, or resold and the new vehicle purchaser does not agree in writing to meet all applicable HVIP requirements in place at the time of resale, the original vehicle purchaser must refund a prorated portion of their voucher to the Grantee within 30 calendar days, in an amount equivalent to the original voucher amount divided by 36 months and then multiplied by the number of months remaining in the original 36 month period (rounded to the nearest month): $(\text{Original Voucher Amount} \div 36 \text{ Months}) \times (36 - \text{months since vehicle or engine purchase or lease date})$.

The original vehicle purchaser must notify the Grantee in writing of its intent to sell the vehicle at least 7 calendar days prior to the vehicle resale. Within 7 calendar days after the vehicle resale, the original vehicle purchaser must notify the Grantee that the vehicle has been resold and provide the resale price. Within 30 calendar days after the vehicle resale, the entity buying the vehicle from the original vehicle purchaser must also provide the Grantee with: a copy of the signed Terms and Conditions, a copy of the new DMV title documenting of the vehicle resale and terms and conditions signed by the new purchaser, and a written commitment to complete and return the annual usage survey/questionnaire as required by the original voucher. CARB reserves the right to pursue all remedies available under the law for noncompliance with these requirements.

c. VEHICLE LEASING

For the purposes of HVIP, any fleet / end-use operator that enters into a lease agreement of three or more years shall be considered the vehicle purchaser. The lease must be specified on the voucher request form and the lease agreement must be uploaded to the Voucher Processing Center before voucher redemption. The vehicle domicile address shall be listed as the lessee fleet address. **Leases shorter than three years are not permitted. Vehicle rentals are not permitted. A purchaser is prohibited from entering into an agreement with another party to operate the vehicle including, but not limited to, vehicle rentals, vehicle subscription services, vehicle sharing platforms, and fleet-as-a-service models. Dealers, manufacturers and any entities under common ownership or control of such**

entities are prohibited from being the lessor entity on HVIP voucher requests without advance approval from CARB. Dealers and manufacturers requesting approval to be a lessor must contact voucherprocessing@tetrattech.com prior to each voucher request. The request must include a summary of the lessor's plan for if the lessee defaults on the loan before 3 years have passed after voucher redemption, specifically either paying back the prorated voucher amount or seeking a new lessee. If the leasing entity is unable to find a new lessee within 90 calendar days, the lessor is responsible for repaying the prorated voucher amount.

Purchasers cannot be lessors. Lessors cannot be purchasers. Any entity that has ever been a purchaser / lessee in HVIP can't be a lessor and any entity that has ever been a lessor in HVIP can't be a purchaser / lessee.

The lessor entity must disclose the voucher amount and voucher terms to the vehicle lessee on the lease agreement. The lease agreement must include all commitments needed from the lessee to ensure that 1) the vehicle operates 100 percent in California as required by the voucher redemption form and 2) all required annual Purchaser Surveys will be submitted.

A truck or bus leasing agency based outside of California is eligible to be a lessor if the vehicle is leased to a California business, non-profit, or government entity that will meet all HVIP operational, reporting, and other applicable requirements.

The cost of the vehicle listed on the lease must match the cost of the vehicle reflected on the final invoice from the dealer to the purchaser, and must specify the rate in the absence of the HVIP voucher, ensuring that the full value of the voucher has been passed on to the lessee and not to intermediary parties. CARB or its Grantee will review lease agreements to confirm appropriate disclosures are made regarding HVIP voucher amount received and vehicle activity and reporting requirements. The lessor entity must provide CARB (or its Grantee) all requested information related to any vehicle leased with an HVIP voucher within 10 calendar days of CARB's written request for such information. An HVIP voucher can be requested at the time of vehicle purchase only, and is not provided at the time a vehicle is leased. If a lease is broken or terminated, the vehicle lessor must notify voucherprocessing@tetrattech.com within 30 calendar days.

If a lessee defaults on the lease agreement, the lessor must work with the dealer to obtain CARB approval, via voucherprocessing@tetrattech.com, to sell or lease the vehicle if within 3 years of voucher redemption, and the vehicle must remain domiciled in California for 3 years after voucher redemption. If the dealer and the lessor is unable to resell the vehicle, the lessor will be responsible for repaying the prorated voucher amount.

In the instance of a Waitlist, any waitlisted voucher requests for vehicles that will be leased require a lessee to be named on the request.

d. BATTERY LEASING

Arrangements in which a vehicle, with the exception of the battery, is purchased and the battery is leased to the vehicle purchaser may be allowed by CARB Project Liaison on a case-by-case basis if the battery lease term is a minimum of three years.

e. SCHOOL BUSES

Eligible Applications for School Bus Funding

Public school districts in California that own their own school buses are eligible to participate in HVIP. This includes public school districts that own their school buses but contract with a County Office of Education or private contractor for maintenance and operations. Where several public school districts have formed a Joint Powers Authority (JPA), and the JPA holds ownership of the school buses, then the JPA is also eligible to participate. Public charter schools that own their own school buses and County Offices of Education that own their own school buses are also eligible to participate.

Private transportation providers that own their own school buses and contract with public school districts to provide transportation services for public school students are also eligible to participate in HVIP. School buses purchased by the contracted private transportation providers count towards the public school district's fleet cap. Public school districts and the private transportation providers that they contract with are considered public fleets for the purposes of the Fleet Size Voucher Adjustment.

Private schools are not eligible purchasers and are prohibited from requesting vouchers.

School Buses Eligible for All-Electric Conversions

School buses with current California Highway Patrol (CHP) safety certifications qualify for an all-electric school bus conversion voucher funding if all other requirements in HVIP are met.

Please see appendix G for information on the Public School Bus Set Aside, which differs from standard HVIP.

f. CALIFORNIA TRIBAL GOVERNMENTS

Tribal governments eligible for HVIP include all federally recognized tribes in California listed on the most recent notice of the Federal Register, and non-federally recognized tribes, including those listed on the California Tribal Consultation List maintained by the California Native American Heritage Commission.

Limited Waiver of Sovereign Immunity: For applicants that are Federally Recognized Tribes or Federally Recognized Tribal controlled entities, all such applicants shall provide and execute a limited waiver of sovereign immunity agreeing to the personal and subject matter jurisdictions of state court and shall require at a minimum, compliance with state construction standards and regulations. Sovereign

immunity waiver language shall be included in the voucher agreement and all regulatory and loan or grant agreements, all of which may be accomplished by incorporating by reference a separately executed sovereign immunity waiver instrument.

E. OVERSIGHT AND ACCOUNTABILITY

Through administration of longstanding incentive programs such as the Carl Moyer Program, CARB has found that project evaluations and program reviews are essential to ensure that incentive program funds are run in accordance with statutory requirements and that State funds are spent transparently and efficiently. The Grantee is responsible for working closely with vehicle manufacturers, dealers and CARB to safeguard HVIP funds from misuse as it implements HVIP. Vehicle dealers and purchasers participating in HVIP must provide CARB or its designee and the Grantee access to all requested files and relevant information related to vehicle purchases involving an HVIP voucher.

CARB holds the overarching responsibility for HVIP fund oversight and project accountability and has final authority and sole discretion over all aspects of HVIP, including applicant and vehicle eligibility, and all program requirements. As such, CARB is responsible for monitoring and reviewing the Grantee's implementation of HVIP. The Grantee shall allow CARB, the Bureau of State Audits, or their designated representative the right to review and to copy any records and supporting documentation pertaining to its development or implementation of HVIP. The Grantee must maintain such records for a possible audit for a minimum of three years after final payment from CARB. The Grantee must allow CARB or its designee access to such records during normal business hours and to allow interviews of any employees who might reasonably have information related to such records.

Responsibilities for HVIP oversight include but is not limited to the following:

- a. CARB has primary oversight responsibility for HVIP to ensure transparent and efficient implementation, and that funds are spent consistent with the requirements of statute, the AQIP Guidelines and Funding Plan, HVIP solicitation and grant agreement with the Grantee, and this Implementation Manual. CARB reserves the right to conduct a site visit, evaluation, review, or audit HVIP for the life of the project grant.
- b. If the Grantee detects any potentially fraudulent activity by a vehicle dealer or purchaser, they shall notify CARB as soon as possible and work with CARB to determine an appropriate course of action.
- c. CARB staff or its designees have primary responsibility for conducting project reviews and/or fiscal audits of HVIP administration and implementation.
- d. Voucher recipients and the Grantee and its subcontractors shall allow CARB, the California Department of Finance, the California Bureau of State Audits, or any authorized designee access, during normal business hours, to conduct HVIP reviews and fiscal audits or other evaluations. Granting of access includes, but is not limited to, reviewing project records, site visits, and other

evaluations as needed. Project evaluations or site visits may occur unannounced as CARB staff or its designee deems necessary.

- e. The Grantee shall, in coordination with CARB, maintain an online Voucher Processing Center (VPC) for dealers to quickly, effectively, and transparently request and redeem vouchers. The VPC shall include all the information necessary for the dealer to submit the voucher request. Only completed and accurate voucher request forms will be accepted. The Grantee will review the voucher request form for eligibility and provide vouchers until HVIP funds are depleted or until CARB pauses requests.

F. PROJECT NON-PERFORMANCE

In the event of non-performance by the Grantee or its subcontractor (s) in administering the HVIP program, CARB reserves all rights and remedies available under the law, including but not limited to, remedies detailed in the Grant Solicitation and Grant Agreement.

In the event of non-performance by the program participant, CARB reserves all rights and remedies available at law, including but not limited to remedies listed in the applicable Terms and Conditions, and in this Implementation Manual.

Compliance with Air Quality Laws. By participating in the HVIP program, the participant understands, acknowledges and agrees that compliance with all applicable federal, state and local air quality rules, regulations and statutes is a precondition to the receipt or use of any state funds provided by or through CARB. The participant understands, acknowledges and agrees that a failure to comply in whole or in part with any local, state or federal air quality rules, regulations or statutes, or a failure to comply, in whole or in part, with any of the requirements or obligations under the program and all applicable terms and conditions is, in each instance, a material breach of the conditions under which state funds were provided or made available, and such breach will result in undue hardship and damages to the Grantee and the State of California, some or all of which may be impossible to easily calculate.

Liquidated Damages. If CARB or the Grantee determines, within its or their sole and absolute discretion, that the HVIP program participant is in breach of program rules or has breached any obligation to remain in compliance with any applicable federal, state or local air quality rules, regulations and statutes, then the HVIP program participant, immediately upon demand, will pay the Grantee (or to CARB, as requested), as recaptured funds or liquidated damages, the full amount of all state funds received during the period of noncompliance, as determined by CARB.

The HVIP program participant agrees that quantifying the losses arising from any breach is inherently difficult insofar as breach may cause the state of California or the Grantee irreparable, serious or substantial harm or damage, including to taxpayers or to the environment. The HVIP program participant further agrees that the above-mentioned amount of recaptured funds or liquidated damages is not a penalty, but rather a reasonable measure of damages based upon experience and given the nature of the losses that may result from said breach. The HVIP program participant agrees that the recaptured funds or liquidated damages have been computed, estimated and agreed upon by all parties and represents an attempt to make a reasonable forecast of probable actual loss because of the

difficulty of estimating with exactness the damages which will result. This obligation shall apply even if there is a concurrent noncompliance or violation of air quality rules, regulations or laws caused by a third party. The remedies set out in this paragraph are contractual in nature.

Nothing stated herein above in any way limits, prevents, or precludes the State of California, CARB or the Grantee from taking any enforcement action, exercising any police power or prosecuting any violation of law against a HVIP program participant, its employees, officers, agents, assigns, representatives, contractors, subcontractors, affiliates, grantees, sub-awardees, subgrantees, or any third parties. CARB retains the authority to suspend and prohibit any entity from participating in the HVIP program if CARB determines, within its sole and absolute discretion, that the HVIP program participant is in breach of program rules.

G. DEFINITIONS

“Account Sharing” is a feature within the VPC which allows multiple HVIP approved dealers within the same organization to view/edit one another’s vouchers.

“Batch” One voucher request that includes a quantity of more than one, with the same purchaser, vehicle, and vehicle domicile

“Bill of Lading” for the purposes of this program means a written receipt that confirms transportation of goods by a carrier (i.e., a binding contract that evidences an agreement of shipment between carrier and shipper; a receipt that acts as evidence of delivery of the shipment). The delivery address should match the domicile address on file.

“CARB-Certified” for the purposes of HVIP means a vehicle that has been certified and issued an Executive Order by CARB.

“CARB Project Liaison” for the purposes of this program is CARB staff person named in this Implementation Manual that serves as the point of contact for coordination with HVIP Grantee.

“California Native American Tribal Government” for the purposes of this program, California Native American tribal governments include all federally recognized tribes in California listed on the most recent notice of the Federal Register, and non-federally recognized tribes, including those listed on the California Tribal Consultation List maintained by the California Native American Heritage Commission.

“Commercial vehicle” for the purposes of this program means any vehicle used by a business, public or governmental agency, or non-profit to carry people, property, or hazardous materials.

“Common ownership or control” for the purposes of this program means being owned by the same person, corporation, partnership, limited liability company, or association. In addition, vehicles managed day to day by the same directors, officers, or managers, or by corporations controlled by the same majority stockholders are considered to be under common control even if their title is held by different business entities. See Appendix C of this Implementation Manual for more information.

“Complete Vehicle” for the purposes of HVIP and as defined by the Federal Transit Administration¹⁵, “a vehicle that requires no further manufacturing operations to perform its intended function. This includes vehicles that are altered only by (1) the addition, substitution, or removal of readily attachable components (such as mirrors, or tire and rim assemblies) or (2) minor finishing operations (such as painting) in such a manner that the vehicle's stated weight ratings are still valid.”

“Dealer” (HVIP approved dealer)” for the purposes of HVIP means the vendor of the complete vehicle or vendor that sells and installs engines in existing vehicles and includes dealers or manufacturers that sell new medium- or heavy-duty vehicles directly to a vehicle purchaser.

“Disadvantaged Communities” for the purposes of this program are identified by the California Environmental Protection Agency (CalEPA).¹⁶ To determine whether a project qualifies as located in a disadvantaged community, the Grantee must use the criteria in Assembly Bill 1550.¹⁷

For the DAC incentive, the domicile address must fall in one of the following areas of the mapping tool at <https://webmaps.arb.ca.gov/PriorityPopulations/>

- Disadvantaged Communities = Yellow on map legend
- Disadvantaged AND Low Income Communities = Green (Yellow AND blue on map legend)
- Low Income Communities within ½ mile of a Disadvantaged Community = Crosshatched purple on map legend
- Low Income Households within ½ mile of a Disadvantaged Community = Crosshatched grey on map legend

“Domicile” for the purposes of this program is defined as the vehicle’s “home base” / deployed location; where the vehicle stays overnight, returns after its route, or is parked when it is not working.

“Earned interest” for the purposes of this program means any interest generated from State AQIP funds provided to the Grantee and held in an interest-bearing account.

¹⁵ <https://www.transit.dot.gov/faq/region-9/there-fta-dictionary>

¹⁶ The identified disadvantaged community census tracts are available at: <http://www.calepa.ca.gov/EnvJustice/GHGInvest/>.

¹⁷ Assembly Bill 1550 Implementation, contains the criteria for determining whether a project is located within a disadvantaged community. This Guidance is available at: <https://www.arb.ca.gov/cc/capandtrade/auctionproceeds/communityinvestments.htm>

“Expend” for the purpose of this program means the payment of funds on an invoice for an eligible vehicle.

“Exportable power” for the purposes of the program means AC electrical power generated by a commercial plug-in vehicle, typically to power electric tools, lighting, or other accessories at a job site.

“Fleet” Fleet means vehicles traveling in California owned by a person, business, non-profit or government agency and consists of one or more vehicles. Vehicles under common ownership or control are considered part of a single fleet even if they are part of different subsidiaries, divisions, or other organizational structures of a company or government agency. A fleet is not a manufacturer, dealership, or leasing company that enters into any agreement with another party to operate the vehicles.

“Fleet size” for the purposes of the HVIP Fleet Size Adjustments and Bulk Purchase Requirement include all vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California, including unregistered and inoperable vehicles. Unredeemed HVIP vouchers count toward this total. **Starting January 1, 2024, consistent with the Advanced Clean Fleet Regulation¹⁸, HVIP’s fleet size definition will include ALL vehicles owned directly or under common ownership, including those domiciled or operated outside of California.**

“g/bhp-hr” for the purposes of this program means grams/brake horsepower-hour.

“Grantee” for the purposes of this program means the entity selected by CARB via competitive solicitation to administer HVIP. The responsibilities of the Grantee are described in this Implementation Manual and in the grant agreement between CARB and the Grantee. The Grantee is responsible for ensuring it and its HVIP subcontractors meet all project requirements.

“Gross vehicle weight rating (GVWR)” for the purposes of this program means the vehicle weight described on the VIN tag or original manufacturer Line Setting Ticket provided to the vehicle dealer.

“Hybrid vehicle” for the purposes of this program means any vehicle that can draw propulsion energy from both of the following on-vehicle sources of stored energy:

1) consumable fuel, and 2) a rechargeable energy storage system.

“Hydrogen Fuel Cell Vehicle” for the purposes of this program means a ZEV that is fueled primarily by hydrogen and does not have plug-in capacity.

“Eligible Engines” for the purposes of this program means any engine certified to the optional Low NOx standard of 0.01 g/bhp-hr as of the publication of this document.

¹⁸ <https://ww2.arb.ca.gov/sites/default/files/barcu/regact/2022/acf22/acffroa2.pdf>

“Incomplete Vehicle” for the purposes of HVIP and as defined by the Federal Transit Administration¹⁹, “an assemblage of components consisting of, as a minimum, frame and chassis structure, powertrain, steering system, suspension system, and braking system - to the extent that those systems are to be part of a completed vehicle.”

“Incremental cost” for the purposes of this program for new vehicle means the difference in cost between HVIP eligible vehicle and a comparable new conventionally fueled vehicle that would be purchased to perform the same function. For engine vouchers, the incremental cost means the difference in cost between a baseline vehicle/engine and vehicle/engine certified to the standard utilizing the same fuel type. This cost is determined on a case-by-case basis based upon a manufacturer’s HVIP eligibility application submittal, HVIP voucher redemption data, discussions with fleets and other stakeholders, and other relevant data and information.

“In-kind services” for the purposes of this program means payments or contributions made in the form of goods and services, rather than direct monetary contributions.

“Lessor Entity,” an entity, often a financial institution, that holds the lease on an HVIP-funded vehicle

“Line setting ticket” for the purposes of this program means the factory build or construction sheet created when the vehicle order is sent to the vehicle manufacturer. The Line Setting Ticket typically includes the new vehicle’s VIN, all the codes for standard equipment and options the salesman used to create this vehicle for his purchaser. After the factory assembles the vehicle and the vehicle is shipped and sold, the Line Setting Ticket identifies such things as the gross vehicle weight rating, engine type, transmission type, drive line, paint codes, gear ratio, and standard and optional equipment, specific to that vehicle.

“Match funding” for the purposes of this program, means those funds contributed by the Grantee directly to HVIP for the sole purposes of funding additional vehicles or increasing the vehicle voucher amount.

“Non-profit” or “Non-profit agency” for the purposes of this program means an agency or corporation that does not distribute corporate income to shareholders and is exempt from federal income taxes under Section 501 of the Internal Revenue Code (26 U.S.C.A. § 501). Non-profits are categorized as private entities in HVIP.

“Plug-in hybrid electric vehicle” (also known as a Grid-connected HEV or GHEV) means a hybrid electric vehicle that has:

- zero emission vehicle range capability

¹⁹ <https://www.transit.dot.gov/faq/region-9/there-fta-dictionary>

- on-board electrical energy storage device with useful capacity equivalent to greater than or equal to ten miles of Urban Dynamometer Driving Schedule range on electricity alone is equipped with an on-board charger, and is rechargeable from an external connection to an off-board electrical source

“Public fleet” for the purposes of this program includes all federal, state, city and other government fleets plus public universities, public airports, public school districts, California public ports and special districts such as water, utility, and irrigation districts.

“Public transit bus” for the purposes of this program means an on-road vehicle greater than 14,000 pounds GVWR, owned or operated by a city or county government; a transportation district / transit district; or a public agency. Public transit includes paratransit and microtransit services operated by or on behalf of a public transit agency, but not shuttle buses with restricted services including but not limited to airport shuttles, university shuttles, and prisoner transport shuttles.

“Purchaser” A purchaser for the purposes of HVIP is the fleet or individual owner / operator who will operate the vehicle for a minimum of three years after voucher redemption, whether through lease or direct purchase. A purchaser is not a manufacturer, dealership, or leasing company that enters into any agreement with another party to operate the vehicle.

“Manufacturer recommended minimum state-of-charge” for the purposes of this program means the minimum allowable battery capacity recommended by the battery manufacturer to ensure the most efficient and durable battery operation, as a percent of the maximum battery capacity.

“Refuse vehicle” For the purposes of HVIP, refuse vehicles are defined as vehicles that collect garbage as a front load, rear load, side load, or other form of garbage packer truck²⁰; and not be a roll-off or other form of waste transfer vehicle.

“Renewable fuel” for the purposes of this program is comprised of definitions of alternative fuels from the Low Carbon Fuel Standard (LCFS), California Code of Regulations Section 95481. Section 95481(79) defines transportation fuel as any fuel used or intended for use as a motor vehicle fuel or for transportation purposes in a non-vehicular source. For HVIP, transportation fuel, as defined above, must satisfy Section 95481(11) that defines Bio-CNG as biogas-derived biomethane which has been compressed to CNG. Additionally, fuel may be produced out-of-state as defined in Section 95481(66) that defines Producer as the entity that made or prepared the fuel. This definition of Producer includes “out-of-state” producers where the production facility is out of the State of California and the entity has opted into the LCFS pursuant to section 95483.1. As more engines that use renewable fuels other than renewable become available, CARB will expand this definition to include those renewable fuels.

²⁰ <https://ww2.arb.ca.gov/resources/fact-sheets/swcv-garbage-roll-and-garbage-packer-requirements#:~:text=%E2%80%9CGarbage%20packer%E2%80%9D%20means%20a%20vehicle,and%20semi%20Automated%20side%20loaders.>

“Repower” for the purposes of this program means the replacement of an existing engine with a new engine certified to any tier of the Optional emission standard approved by CARB instead of rebuilding the existing engine to its original specifications.

“Small Fleet” A small fleet is defined as any entity that has 10 or fewer vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California, including unregistered, inoperable vehicles, and unredeemed HVIP vouchers .

“Telematics” for the purposes of this program means a data acquisition system capable of collecting vehicle GPS data, vehicle mileage and hours of operation.

“Truck Equipment Manufacturer (TEM)” for the purposes of this program means a company that installs equipment on a truck or bus chassis. The TEM bears full responsibility for any vehicle defects under federal law and is responsible for certifying that the vehicle meets all applicable federal safety standards.

“UDDS” means urban dynamometer driving schedule as set forth Appendix I of title 40, Code of Federal Regulations, Part 86.

“Vehicle Type,” listed in Voucher Processing Center and Vehicle Catalog: ePTO, Heavy Duty Bus, Medium Duty Bus, Refuse, School Bus, Step / Panel Van, Straight Truck, Tractor

“Zero-emission power take-off (ePTO)” for the purposes of this program means a method for taking power from an on-vehicle source (typically a battery) that produces no emissions of pollutants (including carbon dioxide, carbon monoxide, hydrocarbons, oxides of nitrogen, and particulates) and which can be used to power truck mounted hydraulic, pneumatic or electric work equipment utilized for performing stationary work.

“Zero-emission vehicle (ZEV)” means a vehicle that itself produces no emissions of pollutants (including carbon dioxide, carbon monoxide, hydrocarbons, oxides of nitrogen, and particulates) when stationary or operating.

“Zero-Emission Vehicle Conversions” for the purpose of this program means removing any type of existing propulsion system and replacing it with a zero-emission propulsion system, such as battery or hydrogen fuel cell powered electric powertrain/drivetrain.

H. LIST OF ACRONYMS

AC	Alternating Current
AQIP	Air Quality Improvement Program
CARB	California Air Resources Board
CA #	California Carrier Identification Number
CCR	California Code of Regulations
CFR	Code of Federal regulations
CMAQ	Congestion Mitigation and Air Quality
DAC	Disadvantaged Community
DMV	Department of Motor Vehicles
DOC	Diesel Oxidation Catalyst
DPF	Diesel Particulate Filter
ePTO	Electric Power Take-Off
FTA	Federal Transportation Authority
FY	Fiscal Year
GGRF	Greenhouse Gas Reduction Fund
GVWR	Gross Vehicle Weight Rating

LESBP	Lower-Emission School Bus Program
MY	Model Year
PEMS	Portable emissions measurement system
NOx	Oxides of Nitrogen
OBD	On-Board Diagnostics

OEM	Original Equipment Manufacturer
SCR	Selective Catalytic Reduction
TEM	Truck Equipment Manufacturer
USC	United States Code
VIN	Vehicle Identification Number
VIP	Voucher Incentive Program
VPC	Voucher Processing Center
ZEV	Zero-Emission Vehicle

APPENDIX A: HVIP Vehicle Eligibility List

The current list of HVIP eligible vehicles, as well as a historical record of some previously-eligible vehicles, and a list of Vehicle Types and active dealers, can be found on the California HVIP website at:

www.californiahvip.org/vehiclecatalog

APPENDIX B: Vehicle Eligibility Applications

Vehicle Eligibility Application Submittal Instructions for Original Vehicle Manufacturers

Please submit the vehicle eligibility application to Patrick Chen by e-mail at Patrick.Chen@arb.ca.gov and provide a signed electronic copy of the application. There is no deadline for application submittal. Vehicle eligibility applications will be evaluated in the order they are received.

Applications for HVIP eligibility must match the corresponding Executive Order including vehicle model year, vehicle model name, chassis, chassis model year, and configuration. Voucher requests that are not identical to the corresponding Executive Order and HVIP Approval Letter may be subject to cancellation. The exception to this is when a letter of attestation is provided addressing Vehicle – EO MY alignment. Specifically, in instances where the Model Year of the VIN for an HVIP-funded vehicle will not match the Model Year on the corresponding CARB Executive Order, a letter of attestation must be provided by the OEM on company letterhead a minimum of 30 calendar days in advance of the voucher request to voucherprocessing@tetrattech.com with the following information: 1) identifying the EO that covers the vehicle for which funds are being requested, 2) listing which Vehicle Models are covered by the corresponding EO, 3) listing which Vehicle MYs are covered by the MY of the corresponding EO, and 4) stating the OEM's understanding that if the OEM delivers an HVIP-funded vehicle that is not covered by the EO and HVIP Approval Letter, the OEM will be responsible for returning HVIP funds and covering any penalties issued by CARB, if applicable.

Questions regarding submittal of the vehicle eligibility application or application requirements should be directed to the CARB Project Liaison at patrick.chen@arb.ca.gov.

All vehicles eligible for HVIP are required to be certified at the vehicle level. Zero-Emission Powertrain Certification (ZEP Cert) is additional requirement for all new HVIP vehicle eligible applications submitted to CARB, for all applicable zero-emission powertrains and the trucks and buses they are installed in. More information is at <https://ww2.arb.ca.gov/our-work/programs/zero-emission-powertrain-certification>

The timeline from when a complete and accurate eligibility application is received by CARB to when the vehicle is available in the HVIP Eligible Vehicles Catalog and Voucher Processing Center (VPC) is an average of 75 days. This includes 60 days for CARB's review and 15 days for HVIP staff to update the Catalog and VPC

Manufacturers should be aware that voucher information regarding their technologies (i.e., quantity by dealer), may be released to the public at www.californiahvip.org and by other mechanisms.

Note: If the MY of an HVIP-funded vehicle changes in the time between when the voucher was requested and when the voucher was redeemed (i.e., MY2022 requested and MY2023 delivered), this does not affect the voucher status / redemption or the purchase order, if the subsequent model year is covered by a CARB Executive Order or letter of attestation as described above. It will be acceptable for the voucher request and purchaser order / sales agreement even if it is not included in the HVIP Vehicle Catalog.

APPENDIX B1: NEW ZERO-EMISSION VEHICLE/ZERO-EMISSION COMMERCIAL VEHICLE CONVERSION ELIGIBILITY APPLICATION

This is an application for new zero-emission and zero-emission vehicle conversion commercial vehicles to be included on the list of vehicles eligible for HVIP. This application must be completed along with the Zero-Emission Vehicle/Zero-Emission Commercial Vehicle Conversion Vehicle Component Cost supplemental application form. Vehicle must receive approval by CARB prior to the vehicle being eligible for a voucher. Zero-emission vehicles subject to the Federal Transit Administration’s (FTA) New Model Bus Testing Program (often referred to as “Altoona Testing”) are required to have passed the testing before becoming HVIP-eligible.

CARB reserves the right to request additional information or clarification of information provided in this application. This application applies to and must be completed by the original vehicle manufacturer or its legal representative.

Please check the box that applies:

- New zero-emission commercial vehicle
- Zero-emission vehicle conversion commercial vehicle

School buses funded specifically with funds from the Public School Bus Set Aside (see Appendix G for more information) must have Vehicle-to-Grid (V2G) functionality and meet the following requirements. Effective January 1, 2024, **all** battery electric school bus eligibility applications for HVIP must meet the requirements.

1. Each bus must have the ability to charge with level 2 SAE J-1772 charging.
2. Each bus must be capable of vehicle-to-grid (V2G) bi-directional charging and discharging via use of type 1 combined charging system (CCS), with a minimum of 60 kW.
3. New school buses must comply with ISO 15118-20 Road vehicles — Vehicle to grid communication interface — Part 20: 2nd generation network layer and application layer requirements.
4. The bus must be designed so that no hardware or firmware changes are necessary to allow the bus to immediately serve demand that is independent of the utility grid (e.g. vehicle-to-load functions that are “islanded” or electrically separated from the utility system).
5. The bus must be able to receive a remote update enabling grid-interconnected V2G functions (e.g. vehicle-to-building functions connected to the utility system), upon completion of applicable requirements for safe electrical interconnection.

Please self-certify that this vehicle meets this definition if the vehicle is a school bus:

- Yes
- No

The self-certification is only required at the time of submittal of this application and will apply to subsequent model years but is not required to be re-submitted for subsequent model years.

Part I: Vehicle Manufacturer Information

1. Manufacturer Name: Tax Identification Number:
2. Staff Contact Name and Title:
3. Business Mailing Address and Contact Information Street:

City:	State:	Zip Code:
Phone: ()	E-mail:	

Please identify the zero-emission vehicle and its baseline (gasoline or diesel-powered) equivalent in Tables 1 and 2, respectively. These vehicles must be of the same make, model, drive configuration (4 x 2 or 4 x 4), frontal area, and gross vehicle weight.

Table 1: Zero-Emission Vehicle Information

Vehicle MY	Vehicle Make and Model (vehicle type, vehicle model, drive configuration (4 x 2 or 4 x 4), and frontal area)	Gross Vehicle Weight Range

Table 2: Baseline Vehicle Information

Vehicle MY	Vehicle Make and Model (vehicle type, vehicle model, drive configuration (4 x 2 or 4 x 4), and frontal area)	Gross Vehicle Weight Range

What is the typical California pre-tax cost of the zero-emission vehicle (identified in Table 1) with normal dealer profit? \$_____

What is the typical California pre-tax cost of this equivalent baseline vehicle (identified in Table 2 with normal dealer profit) \$_____

Part II: Verification of Vehicle Eligibility

A. For vehicle models not currently on the list of eligible vehicles:

Please provide the following information as attachments to this form for each vehicle model listed in Table 1. CARB reserves the right to request additional information to complete the vehicle eligibility evaluation.

- CARB Executive Order (EO) for new zero-emission commercial vehicles.
- For conversions of any type of vehicle to zero-emission, the aftermarket conversion kits must receive an exemption EO from CARB
- Warranty provisions
- After sales service provisions

- MSRP price sheets
- Proof of compliance with the all-electric range requirements identified in Section C(3)(d) of HVIP Implementation Manual
- Briefly describe information provided to vehicle dealers/purchasers regarding proper disposal of both the propulsion and auxiliary vehicle battery and how this information is conveyed

B. For vehicle models currently on the list of eligible vehicles (addition of new model years):

Please check box below if the following statement is true.

- I certify that the vehicle(s) listed in Table 1 have not been modified from the vehicle(s) that were previously approved by CARB for inclusion on the List of Eligible Vehicles including warranty and after sales service provisions.

Please provide the following information for each vehicle model listed in Table 1.

- MSRP price sheets
- CARB EO for new zero-emission commercial vehicles.
- For conversions of any type of vehicle to zero-emission, the aftermarket conversion kits must receive an exemption EO from CARB

Which HVIP-approved -dealers currently sell this vehicle? See www.californiahvip.org/dealerlist.

Part III: Applicant Signature

I certify under penalty of perjury that all information provided in this application and any attachments are true and correct. Additionally, the vehicle manufacturer agrees to the telematics requirement as stated in Section B(1)(l) of the HVIP Implementation Manual.

Printed Name of Responsible Party:	Title:
Signature of Responsible Party:	Date:

APPENDIX B2 – ZERO-EMISSION/ZERO-EMISSION CONVERSION COMMERCIAL VEHICLE COMPONENT COST FORM

This is a supplemental application form for new zero-emission and zero-emission vehicle conversion commercial vehicles to be included on the list of vehicles eligible for the HVIP. This application must be completed and submitted to CARB along with the New Zero-Emission Vehicle/Zero-Emission Vehicle Conversion Eligibility Application for vehicle eligibility approval.

Approved in the Fiscal Year 2020-21 Funding Plan for Clean Transportation Incentives, the application form is a part of the required HVIP vehicle eligibility documentation for each model year to help maintain current data and identify cost trends. Staff will monitor and use the results to better determine voucher incentive amounts or modify voucher amounts for specific applications, vehicle classes, or technologies.

CARB reserves the right to request additional information or clarification of information provided in this application. This application applies to and must be completed by the original vehicle manufacturer or its legal representative.

Please check the box that applies:

- New zero-emission commercial vehicle
- Zero-emission vehicle conversion commercial vehicle

APPENDIX B3: NEW PLUG-IN HYBRID VEHICLE/HYBRID VEHICLE CONVERSION ELIGIBILITY APPLICATION

This is an application for new plug-in hybrid vehicle manufacturers to have a plug-in hybrid vehicle with all-electric range make/model listed as eligible for the Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP). This application must be completed and submitted to CARB, and the vehicle must receive written approval from CARB prior to the vehicle being eligible for a voucher.

This application must be completed by the original vehicle manufacturer or its legal representative. An application must be submitted for each combination of vehicle engine and model years (i.e. a 2020 MY vehicle with a 2019 MY engine and one with a 2020 MY engine require separate applications). CARB reserves the right to request additional information or clarification of responses provided in this application. CARB may require additional information from the vehicle manufacturer or Final Stage Vehicle Manufacturer before listing a vehicle as eligible for funding.

Part I: Original Manufacturer Information

1. Company Name/Organization Name/Individual Name: Tax Identification Number:		
2. Contact Name and Title:		
3. Business Mailing Address and Contact Information Street:		
City:	State:	Zip Code:
Phone: ()	E-mail:	

Part II: Vehicle Description

Please identify the plug-in hybrid vehicle and its baseline (non-hybrid) equivalent in Tables 1 and 2, respectively. These vehicles must be of the same make, model, drive configuration

(4 x 2 or 4 x 4), frontal area, and gross vehicle weight and use the same CARB-certified engine.

Table 1: Hybrid Vehicle Information

Vehicle MY	Engine MY	Hybrid Vehicle Description (vehicle type, vehicle model, drive configuration (4 x 2 or 4 x 4), frontal area, engine model, and hybrid system)	Gross Vehicle Weight Range

Table 2: Baseline Vehicle Information

Vehicle MY	Engine MY	Equivalent Non-Hybrid Vehicle Description (vehicle type, vehicle model, drive configuration (4 x 2 or 4 x 4), frontal area, and engine model)	Gross Vehicle Weight Range

What is the typical California pre-tax cost of the hybrid vehicle (identified in Table 1) with normal dealer profit?
 \$ _____

What is the typical California pre-tax cost of this equivalent baseline vehicle (identified in Table 2) with normal dealer profit?
 \$ _____

Part III: Application Attachments to be Provided by Original Vehicle Manufacturer

A. For vehicle models not currently on the list of eligible vehicles

- CARB Executive Order (EO) for new plug-in hybrid commercial vehicles.
- Provide in-use or chassis dynamometer criteria testing data to ensure the hybrid vehicle does not result in increased NOx emissions compared to an equivalent baseline vehicle. Only vehicles for which the hybrid platform, engine, and after-treatment system continue to function as required will be approved. NOx emissions testing data must demonstrate no increase in NOx emissions compared to an equivalent baseline vehicle.
- Provide proof of compliance with the all-electric range (AER) requirements identified in the HVIP Implementation Manual.
- Minimum warranty provisions.
- After sales service provisions.
- MSRP price sheets.
- Briefly describe what information is provided to plug-in hybrid vehicle dealers/purchasers regarding proper disposal of the plug-in hybrid vehicle battery and how this information is conveyed.

B. For vehicle models currently on the list of eligible vehicles (addition of new model years):

Please check box below if the following statement is true.

- I certify that the vehicle(s) listed in Table 1 have not been modified from the vehicle(s) that were previously approved by CARB for inclusion on the List of Eligible Vehicles including warranty and after sales service provisions.

Please provide the following information for each vehicle model listed in Table 1.

- CARB Executive Order (EO) for new plug-in hybrid commercial vehicles.
- Minimum warranty provisions.
- After sales service provisions.
- MSRP price sheets.
- Briefly describe what information is provided to plug-in hybrid vehicle dealers/purchasers regarding proper disposal of the plug-in hybrid vehicle battery and how this information is conveyed.

Which HVIP-approved -dealers currently sell this vehicle? See www.californiahvip.org/dealerlist.

Part V: Applicant Signature

\$ _____

What is the typical California pre-tax cost with normal dealer profit of the bucket truck identified in Table 1 when equipped with the ePTO system identified in Table 2?

\$ _____

Make and model of vehicle telematics system: _____

Which HVIP-approved -dealers currently sell this vehicle? See www.californiahvip.org/dealerlist.

Part III: Self-Certification of Vehicle, Engine and ePTO Parameters

Please check the box next to each statement if the statement is correct. **Do not check the box if the statement is not correct.**

- The vehicle complies with applicable air quality provisions of California and federal law.
- The vehicle complies with motor vehicle safety provisions of 49 USC Sections 30101 through

30169.

- The vehicle meets the original engine manufacturer's build requirements.
- No modifications have been made to the engine hardware or after-treatment device(s).
- No modifications have been made to the engine's original software calibrations.
- The vehicle meets HVIP minimum three year warranty requirements, as described in Section C(1)(a) of the HVIP Implementation Manual
- The vehicle manufacturer agrees to the telematics requirement as stated in Sections C(1)(m) and C(6)(h) of the HVIP Implementation Manual.
- The ePTO battery is capable of recharging from the manufacturer specified battery cut-off voltage to full charge within twelve hours.
- The battery manufacturer recommended minimum state-of-charge for the ePTO make/model identified in this application equals that in the aerial boom vehicle provided for consumer purchase and intended for the vehicle in-use for a minimum of three years from date of voucher redemption.
- There is at least one service provider for the vehicle in California. Please provide name and city of primary service provider: _____
- The vehicle and ePTO system meet all the requirements of the HVIP, including those identified in this application and the HVIP Implementation Manual.

Part IV: Application Attachments to be Provided by Original Vehicle Manufacturer

- Warranty provisions.
- After sales service provisions.
- MSRP price sheets.
- Manufacturer's vehicle marketing flyer, including vehicle and exportable power specifications and justification for export power usage in proposed vehicle vocation (if requesting HVIP approval of exportable power option).
- If any of the statements in Part III are not true and correct (i.e. if any of the boxes above are not checked), please attach a narrative explaining why.
- Briefly describe what information is provided to vehicle dealers/purchasers regarding proper disposal of the ePTO battery and how this information is conveyed.

Part V: Demonstration of ePTO System

The intent of the ePTO system demonstration is to verify that the ePTO will function entirely on battery power over the course of a typical work day.

The applicant shall work with the CARB Project Liaison or his or her designee to determine an applicable method to demonstrate the ePTO system to ensure that the vehicle completes a typical work day duty cycle without the need for the engine to recharge the battery (i.e. the battery manufacturer recommended minimum state-of-charge is not reached). The use of video conferencing and/or telematics data collection will be required unless specified by the CARB Project Liaison. The CARB Project Liaison may also require in-person demonstration of the ePTO system. The CARB Project Liaison and applicant will agree on the testing method on a case-by-case basis. For more information on ePTO demonstration, see Section C(5) of the Implementation Manual.

The CARB Project Liaison is: Patrick Chen, patrick.chen@arb.ca.gov

Which HVIP-approved -dealers currently sell this vehicle? See www.californiahvip.org/dealerlist.

Part VI: Applicant Signature

I certify under penalty of perjury that all information provided in this application and any attachments are true and correct.

APPENDIX B5: ELIGIBILITY APPLICATION FOR NEW VEHICLE EQUIPPED WITH ENGINE CERTIFIED TO THE OPTIONAL LOW NOX STANDARD OF 0.01 G/BHP-HR

This is an eligibility application for new vehicles equipped with engines certified to the optional Low NOx standard of 0.01 g/bhp-hr. This application must be completed, submitted to CARB, and vehicle must receive approval prior to the vehicle being eligible for a voucher.

Do not use this application for an engine used for a repower.

CARB reserves the right to request additional information or clarification of information provided in this application. This application applies to and must be completed by the original vehicle/ engine manufacturer or its legal representative.

Engine Model Year	
Engine Make/Model	
Executive Order Number	

What is the typical California pre-tax cost of the vehicle equipped with engine certified to the optional Low NOx standard of 0.01 g/bhp-hr(identified in Table 1) with normal dealer profit? \$ _____

What is the typical California pre-tax cost of this equivalent baseline vehicle (conventional engine identified in Table 2) with normal dealer profit \$ _____

Part II: Verification of Vehicle Eligibility

A. For vehicle models not currently on the list of eligible vehicles:

Please provide the following information as attachments to this form for each vehicle model listed in Table 1. CARB reserves the right to request additional information to complete the vehicle eligibility evaluation.

- CARB engine Executive Order
- Warranty provisions for engine and vehicle
- After sales service provisions
- MSRP price sheets

B. For vehicle models currently on the list of eligible vehicles (addition of new model years):

Please check box below if the following statement is true.

- I certify that the vehicle(s) listed in Table 1 have not been modified from the vehicle(s) that were previously approved by ARB for inclusion on the List of Eligible Vehicles including warranty and after sales service provisions.

Which HVIP-approved -dealers currently sell this vehicle? See www.californiahvip.org/dealerlist.

Part III: Applicant Signature

I certify under penalty of perjury that all information provided in this application and any attachments are true and correct.

Printed Name of Responsible Party:	Title:
Signature of Responsible Party:	Date:

APPENDIX C: Vehicles Under Common Ownership or Control

If vehicles are under common ownership, for the purposes of the Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP) this means that they are owned by the same person, corporation, partnership, limited liability company, or association, including sharing a Tax Identification Number (TIN) or California Carrier Identification Number (CA#) In addition, vehicles managed day to day by the same directors, officers, or managers, or by corporations controlled by the same majority stockholders are considered to be under common control even if their title is held by different business entities.

The examples provided below are intended to further specify, for the purposes of HVIP, the definition of common ownership, corporation, or other entity wishing to purchase or lease an HVIP eligible vehicle or engine.

Example 1 – Parent/Child Company

The George Corporation forms a new, wholly owned corporation, Sam’s Transportation Services, and secures a different federal tax identification number for it. While the George Corporation and Sam’s Transportation Services can report and comply separately with the regulation, because they are under common ownership, the total number of vehicles of both must be summed in order to determine the fleet size.

Example 2 – Common Ownership

The ABC Company and the 123 Company are wholly-owned subsidiaries of Alphabet Group Incorporated. They were acquired by Alphabet Group Incorporated in 1950 and 1970, respectively. Alphabet Group Incorporated is located in Nevada, however ABC Company and 123 Company are both located in California and each have their own Federal Tax Identification numbers. In addition, they each have unique motor carrier numbers. Both ABC and 123 are decentralized, with most of the decision making pushed down to the operating company level. However, the corporate office centralizes things like insurance, bonding, cash, and financial statement consolidation.

Because ABC and 123 are under common ownership, the total number of vehicles of this fleet must be determined by adding up all the vehicles for ABC and 123. However, ABC and 123 can report and comply separately with the regulation.

Example 3 – Common Control

Bill Brown owns Brown’s Transportation and controls the day to day operation of his fleet. Bonnie Brown is the owner of Bonnie’s Transportation, but her vehicles are controlled on a day to day basis by Bill Brown. Mr. Brown makes decisions regarding vehicle use, maintenance, purchases and sales, etc. Because Brown’s Transportation and Bonnie’s Transportation fleets are under the common control of Mr. Brown, all of the vehicles in both fleets must be summed to determine their fleet size. If, for example, the summed vehicles exceed three, neither could utilize the small fleet provision.

Example 4 – 50/50 Ownership

John Smith owns Company A, and Jane Doe owns Company B. John and Jane also each both own 50 percent of Company C. Because neither John nor Jane have a majority stake in Company C (neither have more than 50 percent), as long as Company C is not under common control with either Company A or B, neither John nor Jane must add Company C's vehicles to their own when determining fleet size. Each fleet - Company A, B, and C would report separately and determine its fleet size separately.

If, however, John controlled both the Company A and Company C fleet on a day-to-day basis (managing the vehicles use, maintenance, purchases and sales, etc.), then Company A and Company C's vehicles would need to be combined when determining fleet size.

CARB enforcement may use organizational documents of fleet owners (such as articles of incorporation) to validate fleet ownership.

Example 5 – Farming Business

Top Grade Dairy owns two dairies in Tulare with 100 milking cows at each location. John Smith, the owner, the president, and CEO of the company manages the day to day operations. Top Grade Dairy owns the land where the dairies are located and also owns 25 acres where sorghum is grown. Mr. Smith formed a limited liability company, where he is the only member, called Top Grade Silage, which is also managed by Mr. Smith, and only supplies silage to Top Grade Dairies. Each company has a different federal tax identification number.

Since Mr. Smith owns both companies, all the vehicles owned by both Top Grade Dairy and Top Grade Silage would be counted to determine fleet size.

For purposes of determining whether each company meets the definition of a farming business, each business entity must be examined separately. Top Grade Dairy clearly meets the definition of a farming business because it is involved in the operation of a farm as an owner. However, Top Grade Silage does not own the land and therefore does not meet the definition of a farming business. If Top Grade Silage had owned the land, or was a tenant, it would meet the definition of a farming business.

Joint ventures are not considered common ownership or control.

Fleet size definitions:

For the purposes of HVIP fleet size definitions, "common ownership or control" means being owned by the same person, corporation, partnership, limited liability company, or association. In addition, vehicles managed day to day by the same directors, officers, or managers, or by corporations controlled by the same majority stockholders are considered to be under common control even if their title is held by different business entities. Vehicles owned by different entities but operated by using common or shared resources to manage the day-to-day operations by using the same motor carrier number, displaying the same name or logo, or contractors who represent the same company are considered to be under common ownership or control. Common ownership or control includes relationships where the controlling party has the right to direct or control the vehicle as to the details of when, where, and how work is to be performed or where expenses for operating the vehicle, such as fuel or insurance, are shared. However, if the purchaser is hired as a contractor

by a larger fleet the purchaser does not need to count trucks operated by the hiring fleet as part of the purchaser's fleet size, though the contractor's vehicles are counted as part of the hiring fleet. At CARB's sole discretion the contractor may be required to provide additional documentation, including but not limited to, copies of their California Business License, CA # or DOT #, or a copy of their written contract agreement with the hiring fleet. Common ownership or control does not include agreements for individual loads that are competitively bid and issued to the lowest qualifying bid, and such agreements do not need to be counted towards a purchaser's fleet size.

HVIP's fleet size definition includes all vehicles with a GVWR greater than 8,500 lbs. which are domiciled in California. Unregistered and inoperable vehicles count towards a purchaser's fleet size. Yard trucks and other off-road vehicles do not count toward the fleet size.

A small fleet is defined as any entity that has 10 or fewer vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California. Unredeemed HVIP vouchers do count toward this total. For example a fleet with 8 vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California that also has 4 existing unredeemed voucher requests does not qualify as a small fleet in HVIP. Any entity requesting more than 10 HVIP vouchers also does not qualify as a small fleet in HVIP.

Additional verification of fleet size may be required at CARB's sole discretion, including site visits.

Starting January 1, 2024, consistent with the Advanced Clean Fleet Regulation²¹, HVIP's fleet size definition will include ALL vehicles owned directly or under common ownership, including those domiciled or operated outside of California.

Appendix D: HVIP VOUCHER REQUEST FORM

**HVIP Voucher Request Form
Information to be submitted by Dealer
via online Voucher Processing Center portal**

Additional mandatory information to complete this voucher request must be provided by the purchaser, and reviewed by the dealer before the dealer signs Terms and Conditions

Vehicle _____

Voucher ID _____

Date _____

Number of Vouchers in Batch (Quantity in Request) _____

Vehicle Type _____

Vehicle Information:

Vehicle Manufacturer:	Vehicle Model Year:
GVWR:	Preliminary Voucher Amount:

Information about Purchaser

Is this Vehicle a Lease? Yes No (Lessee must be listed as Purchaser)

If the Vehicle is a Lease, are there any other business relationships between the lessee, dealer, and lessor? (e.g. lessee is a subsidiary of the leasing entity or dealership). If yes please describe. Yes No

Note: After the voucher request is submitted, lessee (end-user fleet / operator) CANNOT change

Purchaser Contact Name (person with signing authority): _____
--

Optional: Secondary Contact Name (I.e., fleet manager or data manager) (This secondary person will receive ALL notifications that primary contact receives):	
Purchaser Company / Entity:	
Parent Company, if any:	
Mailing address:	
City, State, Zip code:	
Phone:	Email:
Is Mailing address the same as vehicle Domicile? (deployed "home base") Yes <input type="checkbox"/> No <input type="checkbox"/>	
If No please indicate the domicile (deployed "home base") address below:	
Address:	
City, State, Zip code:	
<ul style="list-style-type: none"> • Is domicile address in a disadvantaged community? Yes <input type="checkbox"/> No <input type="checkbox"/> (Find out by entering address at https://webmaps.arb.ca.gov/PriorityPopulations/ Addresses in the following areas qualify) Disadvantaged Communities = Yellow on map legend • Disadvantaged AND Low Income Communities = Green (Yellow AND blue on map legend) • Low Income Communities within ½ mile of a Disadvantaged Community = Crosshatched purple on map legend • Low Income Households within ½ mile of a Disadvantaged Community = Crosshatched grey on map legend <p><u>Please note that effective Jan. 1, 2023, private fleets with more than 500 vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California can only request vouchers for vehicles domiciled in one of the areas indicated above. Requests for vehicles not domiciled in one of these areas will be cancelled.</u></p> <p>-----</p> <p>Fleet size (# of vehicles) _____</p> <p>Fleet size must include all vehicles of GVWR greater than 8,500 lbs under common ownership or control and domiciled in California, including unregistered and inoperable vehicles. Do not include vehicles 8,500 lbs and smaller. Additional verification of fleet size may be required at CARB's sole discretion, including site visits. Yard trucks and other off-road vehicles do not count toward the fleet size.</p>	

Please note that a fleet size of zero is not acceptable. If this voucher request represents the first purchase of a vehicle with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California, please enter a fleet size of "1".

Effective Jan. 1., 2023, a **Bulk Purchase** requirement is in effect for private fleets with more than 500 vehicles with a GVWR greater than 8,500 lbs under common ownership or control and domiciled in California.

Is the PO for this request for more than 30 HVIP-eligible vehicles? Yes No

If yes, please upload it in this request. The HVIP incentive will only be applied for the vehicles purchased above 30.

If the PO is for *fewer than 30 HVIP vouchers*, meaning the bulk order is comprised of POs from more than one dealer / manufacturer, HVIP staff will work with the purchaser to manage the remaining PO(s) for the bulk order.

Bulk purchases are not required for fuel cell vehicles.

For the purposes of HVIP fleet size definitions, "common ownership or control" means being owned by the same person, corporation, partnership, limited liability company, or association. In addition, vehicles managed day to day by the same directors, officers, or managers, or by corporations controlled by the same majority stockholders are considered to be under common control even if their title is held by different business entities. Vehicles owned by different entities but operated by using common or shared resources to manage the day-to-day operations by using the same motor carrier number, displaying the same name or logo, or contractors who represent the same company are considered to be under common ownership or control. Common ownership or control includes relationships where the controlling party has the right to direct or control the vehicle as to the details of when, where, and how work is to be performed or where expenses for operating the vehicle, such as fuel or insurance, are shared. However, if the purchaser is hired as a contractor by a larger fleet the purchaser does not need to count trucks operated by the hiring fleet as part of the purchaser's fleet size, though the contractor's vehicles are counted as part of the hiring fleet. At CARB's sole discretion the contractor may be required to provide additional documentation, including but not limited to, copies of their California Business License, CA # or DOT #, or a copy of their written contract agreement with the hiring fleet. Common ownership or control does not include agreements for individual loads that are competitively bid and issued to the lowest qualifying bid, and such agreements do not need to be counted towards a purchaser's fleet size.

Starting January 1, 2024, consistent with the Advanced Clean Fleet Regulation, HVIP's fleet size definition will include ALL vehicles owned directly or under common ownership, including those domiciled or operated outside of California.

Name of Lessor Entity, if vehicle is a lease _____
Name of Contact at Lessor Entity _____
Phone _____
Email _____

Note: Dealers, manufacturers and any entities under common ownership or control of such entities are prohibited from being the lessor entity on HVIP voucher requests without advance approval from CARB. Dealers and manufacturers requesting approval to be a lessor must contact voucherprocessing@tetrattech.com prior to each voucher request. Purchasers cannot be lessors. Lessors cannot be purchasers. Any entity that has ever been a purchaser / lessee in HVIP can't be a lessor and any entity that has ever been a lessor in HVIP can't be a purchaser / lessee.

Information about Dealer

Dealer Name:		Company Name:	
Street address:			
City:		State:	Zip Code:
Email:		Phone:	

IMPORTANT NOTES: 1) In the instance of batch requests, the domicile address must be the same for all vehicles in the batch. Separate voucher requests are required for differing domiciles. 2) If this request includes multiple vouchers, please be aware that only the first voucher number may appear on the form in the Voucher Processing Center. 3) Requests for an operator who is different than the purchaser, i.e. a third-party contractor operating on behalf of a transit agency, may be approved at CARB's sole discretion, by contacting voucherprocessing@tetrattech.com

HVIP Voucher Request Form
Information to be completed by Purchaser / Lessee
via online Voucher Processing Center portal

[Form populates the information that was already entered by the dealer, then gathers the following info from purchaser]

CA# Reason for exemption (if applicable):				
DOT# Reason for exemption (if applicable):				
TRUCRS ID Reason for exemption (if applicable):				
NOTE: Purchasers claiming exemption for CA#, DOT#, or TRUCRS must submit a letter of explanation to voucherprocessing@tetrattech.com within 30 calendar days of the date the voucher was requested.				
<p>Labor Compliance Attestation: <i>If you are purchasing any Class 2B truck, Refuse Vehicle, Panel / Step Van, Straight Truck, or Tractor</i></p> <p>Please go to www.CAZEVLaborLawCompliance.org to certify compliance with state labor laws. This attestation will be required annually, until three years after voucher redemption. The attestation includes that the purchaser will retain direct control over the manner and means for performance of any individual using or driving the vehicle. Your voucher will not progress to the status of Accepted Pending Signed Forms in the HVIP Voucher Processing Center until this is complete. This is required regardless of whether you have completed the attestation before in another program.</p>				
<p><i>[This question should show up for refuse vehicles, straight trucks, 2b, and tractors and show up as N/A for panel/step vans, med duty bus, heavy duty bus, school bus, and epto.]</i></p> <p>Is the vehicle performing Refuse operations? Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>If yes, will this vehicle be used as a garbage packer truck (front, rear or side loader) for solid waste collection? Roll-off and transfer trucks are excluded from the 25% incentive increase. Further verification will be required from the purchaser before redemption. Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p><i>[This questions should show up for qualifying class 8 tractors only, N/A for everyone else]</i></p>				

Is the vehicle performing Drayage operations as defined in the Implementation Manual? Yes

No

If the vehicle is performing Drayage operations, are any operations taking place at the Port of Los Angeles? Yes No

If the vehicle is performing Drayage operations, are any operations taking place at the Port of Long Beach? Yes No

If the vehicle is performing drayage operations at the Port of Los Angeles AND the Port of Long Beach, which port will be utilized more frequently? POLA POLB

[This question should show up for medium or heavy duty bus only, N/A for everyone else.]

Is the Purchaser a Public Transit Agency, or otherwise meeting the definition of "Public Transit" provided in the Implementation Manual?

Yes No

Does the purchaser have the existing charging infrastructure to charge this vehicle?

Yes No

If you do not have existing charging infrastructure, is there a plan or procurement schedule for acquiring the necessary charging infrastructure? *[Only show if previous answer is no]*

Yes No

If yes, are there planning or procurement schedules in addition to those stated in the California Innovative Clean Transit planning process? *[Only show if previous answer is yes]*

Yes No

If you do not have existing charging infrastructure, is a project to install infrastructure already under way? *[Only show if previous answer is no]*

Yes No

If a project is under way, what stage is it at? *[Only show if previous answer is yes]*

Planning Design Construction Closeout

If you do not have charging infrastructure, do you need to build more infrastructure to charge this vehicle? *[Only show if previous answer is no]*

Yes No

Do you have a station design completed for this infrastructure? (only show if previous answer is yes)

Yes No

Do you need H2 infrastructure for this vehicle or electric charging infrastructure?

H2 Electric Both

If the vehicle is electric, did you talk to your utility regarding charging infrastructure needs for the infrastructure for this vehicle? (only show if previous answer is yes or both)

Yes No

If you are not sure which utility service provider is relevant to your project, refer to the map at <https://cecgis-caenergy.opendata.arcgis.com/apps/california-electric-infrastructure-app/explore>, select the "Layer List" icon (second from left) check the Electric Load Servicing Entities boxes (clear all others), then type the vehicle domicile address in the search bar. Information will pop up including the name of the utility that services the property.

If the vehicle is electric, have you carried out demand estimates for grid upgrades for your charging infrastructure? (only show if H2 or electric answer is yes or both)

Yes No

Have you considered resiliency planning and microgrid components or services for electric infrastructure upgrades? (only show if H2 or electric answer is yes or both)

Yes No

Have you selected the type of charger for this vehicle? (only show if H2 or electric answer is yes or both)

Yes No

Do you need technical assistance on how to procure infrastructure? Please rate your need on a scale of 1-5 (1 is no, 3 need some resources, 5 need hands on assistance)

1 2 3 4 5

Do you need help selecting the right charger? (only show if previous answer is 2-5)

Yes No

Do you need help finding a contractor to manage the project? (only show if previous answer is 2-5)

Yes No

Do you need funding for charging infrastructure?

Yes No

Do you need help navigating funding options for infrastructure? (only show if previous answer is yes)

Yes No

Do you have any existing ZEVs that need charging infrastructure?

Yes No

Do you meet the following requirements for EnergIIZE?

- Do you have proof of commercial battery electric vehicle ownership with State of California registration, **OR**
- A MD/HD electric vehicle purchase order?
 - o Note: Vehicles may be purchased with support from State or Federal vehicle incentive projects including, but not limited to: HVIP, Carl Moyer, AB 617, CORE, VW, TA Low No, EPA DERA, TIRCP, CALSTEP, CMO, and other incentive projects.
 - o Do you meet requirements for the EnergIIZE DAC definitions?
 - See definitions in the EnergIIZE Implementation Manual Appendix J, available in energIIZE.org/irc under Project Resources (a Disadvantaged Community or Low Income Community is considered there is defined according to CalEnviroScreen 4.0 or the specified equivalents, in Appendix J subitem 3.)

Yes No

- Do you have difficulty in determining whether you are meeting requirements for projects within Disadvantaged Communities?
 - o Yes No
- Do you have difficulty in determining whether you are qualified EnergIIZE applicant?
 - o Yes No

[This question should show up for school buses only, N/A for everyone else]

Is the Purchaser a Public School District?

Yes No

If the Purchaser is a Public School District, which air district is the school district headquarters / main office located in? See map at http://www.capcoa.org/images/mapimages/index_01.gif

Please categorize the fleet / organization

- Public (government entity)
- Private

If Private, please identify the total revenue, receipts, and sales reported to the Internal Revenue Service in the purchaser entity's most recent filing. This information may be reported

in Box 1c of IRS Form 1120, Box 1c of IRS Form 1065, or Box 3 of IRS Schedule C (Form 1040).

≤\$10,000

>\$10,000 and ≤ \$15,000

>\$15,000 and ≤ \$25,000

>\$25,000 and ≤ \$35,000

>\$35,000 and ≤ \$50,000

>\$50,000 and ≤ \$75,000

>\$75,000 and ≤ \$100,000

>\$100,000

If you do not have this information, provide a letter of explanation to voucherprocessing@tetrattech.com within 30 calendar days of the voucher request. Note: There is no revenue provision for public fleets.

Is the Purchaser entity a California Native American Tribal Government? See definition in the Implementation Manual for included categories of entities Yes No

If Private, is the purchaser entity a 501(c)(3) nonprofit? If yes, please provide your IRS Determination Letter or Form 990 to voucherprocessing@tetrattech.com within 30 days. Yes No

If Private, is the purchaser entity a Small Business as recognized by the California State Legislative Code, Section 14837(d), including annual revenue of less than \$15 million? Yes No *This question is for metrics purposes only and does not affect your voucher in any way.*

If yes, please attach documentation of the Applicant's Small Business (SB) certification by the California Department of General Services, Procurement Division (DGS-PD).

If Private, is the purchaser entity designated by the U.S. Dept of Transportation as a Disadvantaged Business Enterprise, per <https://dot.ca.gov/programs/civil-rights>? Yes No *This question is for metrics purposes only and does not affect your voucher in any way.*

If Private, is the purchaser entity a Certified Minority Business Enterprise as defined by California Public Contract Code, Article 12, Woman-Owned Small Business, Veteran-Owned

Small Business, or LGBT-Owned Small Business?

Yes No *This question is for metrics purposes only and does not affect your voucher in any way.*

If yes, please upload:

- Documentation of the Applicant's Small Business (SB) or Disabled Veteran Business Enterprise (DVBE) certification by the California Department of General Services, Procurement Division (DGS-PD), Office of Small Business and Disabled Veteran Business Enterprise Services (OSDS).
- Documentation of the Applicant's certification as a Disadvantaged Business Enterprise (DBE) from CALTRANS, the US Department of Transportation, or another DBE Certifying Agency.
- For more information, please see https://leginfo.legislature.ca.gov/faces/codes_displayText.xhtml?lawCode=PCC&division=2.&title=&part=2.&chapter=2.&article=12.

To support the deployment of your new clean vehicle, this HVIP voucher may be able to be accompanied by infrastructure funding from the California Energy Commission's EnergIIZE Commercial Vehicles project. Please indicate below whether you are interested in infrastructure funding, and more information about timeline and participation details will be provided to you.

1. I already have infrastructure funding in place to support this vehicle(s):
 Yes No
2. If Yes, I have received funding from EnergIIZE
 Yes No
3. I am interested in receiving EnergIIZE funding for infrastructure for this vehicle(s):
 Yes No
4. I am purchasing a drayage vehicle and plan to use public charging
 Yes No
5. I am interested in completing the items on the EnergIIZE permitting checklist to help my project get completed more quickly (The checklist is in the EnergIIZE Implementation Manual, Appendix K, available at www.Energiize.org/irc under Project Resources)
 Yes No

6. Have you contacted your utility service provider to discuss your project goals?
 Yes No
 - If you are not sure which utility service provider is relevant to your project, refer to the map at <https://cecgis-caenergy.opendata.arcgis.com/apps/california-electric-infrastructure-app/explore>, select the “Layer List” icon (second from left) check the Electric Load Servicing Entities boxes (clear all others), then type the vehicle domicile address in the search bar. Information will pop up including the name of the utility that services the property.
7. Have you selected a charger for your project?
 Yes No
8. Do you need project site help for your project?
 Yes No
9. Do you need charger help for your project?
 Yes No
10. Do you need EnergIIZE application help?
 Yes No

This voucher request represents my organization’s first zero-emission vehicle purchase

Yes No

If you are purchasing any Class 2B truck, Refuse Vehicle, Panel / Step Van, Straight Truck, or Tractor, please answer the following questions about your insurance. Please also answer these questions if you are a private entity purchasing any bus (public entities do not need to answer if purchasing a bus)

1. I plan to obtain the following insurance for this vehicle(s): please list insurer and plan type.

 Your answer will not affect your voucher status in any way, though insurance coverage is required by law once the vehicle has been delivered.
2. What is your estimated annual cost to insure this vehicle(s)?
3. Were there any barriers or concerns that you faced in obtaining insurance? If yes, please explain.
4. If you own non-ZEV trucks or tractors in your fleet that are similar to your ZEV vehicle(s), does it cost more, less, or about the same to insure your HVIP vehicle(s) compared to a similar internal combustion engine (ICE) vehicle?

HVIP Terms and Conditions Form **Purchaser / Lessee**

As a condition for participating in the State of California, Air Resources Board (CARB)

Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP), the purchaser/lessee must comply with the requirements below:

1. I have reviewed and verified all information in all sections of the voucher request, including the fleet definitions, DAC, and all other Purchaser Information on this request form, and including the Vehicle and Vehicle Vocation / Type selected for this voucher;
2. I certify compliance with state labor laws, and will remain in compliance with labor laws for at least three years after voucher redemption, and will retain direct control over the manner and means for performance of any individual using or driving the vehicle. I will attest annually at <https://www.cazevlaborlawcompliance.org/s/>.
3. I have read, understand and agree to all provisions in HVIP Implementation Manual;
4. I understand that I am prohibited from entering into an agreement with another party to operate the vehicle including, but not limited to, vehicle rentals, vehicle subscription services, vehicle sharing platforms, and fleet-as-a-service models
5. If this voucher includes the Drayage Early Adopter Incentive, I certify that my fleet activities meet the definition and requirements in this document.
6. I agree to register the vehicle in California with the Department of Motor Vehicles (DMV). Military and U.S. Postal Service vehicles are not subject to this requirement;
7. I agree to allow CARB, Grantee, or their designee to verify the vehicle registration with the DMV;
8. I agree to maintain vehicle insurance as required by law;
9. I agree to never modify the vehicle's emission control system, engine, or engine software calibrations;
10. I agree to ensure plug-in vehicles purchased with an HVIP voucher, including plug-in hybrid vehicles, plug-in electric vehicles, and work vehicles with zero- emission power take-off, will be plugged in regularly as recommended by the vehicle manufacturer to ensure battery durability, efficiency, and reliability;
11. I agree to provide access to necessary charging equipment at the domicile location, or a copy of their company's charging policy showing plug-in access;
12. I understand that the fleet must be in compliance and remain in compliance with all applicable federal, state, and local air quality rules and regulations, including but not limited to the CARB Truck and Bus Regulation; furthermore I understand that CARB reserves the right to check compliance at any time;
13. If I have claimed exemption from TRUCR regulation reporting, I acknowledge that I must submit a letter of explanation to voucherprocessing@tetrattech.com within 30 calendar days of the date the voucher was requested;
14. I agree to own/lease and operate this vehicle 100 percent in California for a minimum of three years from the date of voucher redemption unless: 1) the vehicle is an emergency response vehicle which may be deployed out of state, 2) the vehicle address identified in this form is in a county which borders Arizona, Nevada,

- Oregon or Mexico, or 3) the vehicle is a Class 8 truck conducting business outside of California. In the first two cases only, the vehicle may operate outside of California for up to 25 percent of its mileage. For the third case, the vehicle may operate outside of California for up to 50 percent. Military vehicles are not subject to this requirement;
15. I agree to retain ownership/lease of the vehicle for at least three years from the date of voucher redemption, unless given explicit prior written approval from CARB to sell or transfer the vehicle;
 16. I understand that I will receive automated emails from the HVIP Voucher Processing Center when the Dealer requests a voucher on my behalf; when the voucher has been redeemed by the Dealer; and in any instance wherein the voucher is cancelled for any reason. I will notify voucherprocessing@tetrattech.com if a different person should receive these messages instead;
 17. I agree to keep written records of the vehicle purchase/lease for three years after the purchase/lease date and provide CARB or its designee with these records within ten days of their request. These records include but are not limited to the vehicle invoice, proof of purchase, DMV records, vehicle payment information and related bank records, and purchaser/lessee fleet information;
 18. I agree that the purchased/leased vehicle and emission reductions it generates shall not be used as emission reductions to comply with an enforcement obligation of any person or entity other than CARB;
 19. I agree to complete the annual usage survey and questionnaire for three years, as requested by CARB. Military vehicles are not subject to this requirement;
 20. I agree that all information associated with this voucher request and voucher redemption, including business name and address, contact information, and sales transaction are public information and subject to release;
 21. I understand that this information will also be shared with geographically relevant utility provider(s) for the purposes of infrastructure planning and incentive coordination, as well as with infrastructure providers if I am requesting infrastructure coordination through the EnergIIZE Commercial Vehicles project.
 22. I agree to disclose all sources of public funding that apply to the purchase of any vehicles for which I request HVIP vouchers;
 23. I agree to the Manufacturers Terms and Conditions for usage of the vehicle's telematics device. Additionally, I agree to allow the Manufacturer to have access to the vehicle location and on/off data so the Manufacturer can report to CARB Grantee, or their designee the vehicle operation telematics for each HVIP-funded vehicle within disadvantaged communities. Vehicles equipped with Natural Gas Internal Combustion engines, and military vehicles are exempt from this requirement;
 24. I agree to be available for a follow-up inspection by CARB, Grantee or their designee, if requested;
 25. The information provided in this application is true and all supporting documentation is true and correct and meet the minimum requirements of HVIP;
 26. I have the legal authority to apply for incentive funding for the purchasing entity described in this agreement;
 27. I agree that failure to comply with the terms of this agreement may result in repayment to CARB of voucher funds received;
 28. I understand that this HVIP voucher request is only valid for this specific vehicle purchased/leased through this specific dealer/manufacturer, and that any voucher

provided based on this voucher request will be null and void if the purchaser/lessee, dealer/manufacturer, or vehicle identified herein change prior to voucher redemption or for noncompliance with applicable HVIP requirements;

- 29. I understand that after a voucher request is submitted, the lessee / end-user fleet / operator cannot be changed;
- 30. (Refuse vehicles with the 25% Refuse Modifier ONLY) I understand that the vehicle(s) affiliated with this voucher must have a loading arm (front, rear or side) for the collection of solid waste in order to receive the 25% Refuse incentive increase.
- 31. I understand that CARB reserves all rights and remedies available under the law to enforce the terms of this agreement.
- 32. I have reviewed the fleet size information provided by the dealer on this request, and I attest that it accurately represents the size of my fleet of vehicles that are of GVWR greater than 8,500 lbs under common ownership or control and domiciled in California. I understand that CARB may require additional verification of fleet size, including site visits.

Per #22: Additional Public Funding Sources for this Vehicle:

(Note: Formula funding from the Federal Transit Administration does not need to be included; discretionary FTA funds do need to be included)

NOTE: Programs that can now be stacked with HVIP for small fleets include but are not limited to the Carl Moyer Memorial Air Quality Standards Attainment Program and the CARB Truck Loan Assistance Program. Fleets size 10 and smaller can combine state funding sources with HVIP, if the other program allows stacking, each incentive program is not paying for the same incremental cost, and the non-HVIP incentive program is not required to generate greenhouse gas emission reductions.

Transit buses operated by or on behalf of a city or county government; a transportation district / transit district; or a public agency, including paratransit and micro-transit services may stack State-funded incentives with HVIP *regardless of fleet size*. When stacking HVIP vouchers with other funding sources for public transit buses, HVIP funding may be combined with the provision that HVIP will only fund the remaining cost up to the maximum voucher amount after the other incentives have been applied at their maximum allowable amounts.

Funding Source (i.e, name of grant program)	Funding Organization	Anticipated Funding Amount	Date or Anticipated Date of Funding

By signing HVIP Voucher Request and Terms and Conditions Form, I acknowledge that I have read and understand, and agree to be bound by, the terms and conditions as outlined above.

I certify under penalty of perjury that the information provided is accurate.

**HVIP Voucher Request and Terms and Conditions Form
Dealer**

1. I have read, understand and agree to all provisions in the HVIP Implementation Manual;
2. The vehicle and vehicle order information on this form are true and correct;
3. I certify that this HVIP voucher request corresponds with a real and completed vehicle order, which has not yet been delivered to the purchaser;
4. I understand that after a voucher request is submitted, the lessee / end-user fleet operator cannot be changed;
5. I agree to seek pre-approval from the California Air Resources Board before any sale of the vehicle or any lease not included on the Voucher Request Form;
6. I have not inflated the price of the HVIP funded vehicle and I agree to deduct 100% of the requested voucher amount from the price of the vehicle;
7. I agree to be available for a follow-up inspection by the California Air Resources Board, Grantee, or their designee, if requested;
8. I agree to keep written records of the vehicle purchase for three years after the purchase date and provide the California Air Resources Board or its designee with these records within ten days of their request. These records include but are not limited to the vehicle invoice, proof of purchase, California Department of Motor Vehicle records, vehicle payment information and related bank records, and purchaser fleet information;
9. I understand that this HVIP voucher request is only valid for this specific vehicle purchaser/lessee and vehicle, and that any voucher provided based on this voucher request will be null and void if the purchaser/lessee and vehicle identified herein change prior to voucher redemption or for noncompliance with applicable HVIP requirements;
10. I agree to keep my Voucher Processing Center account active while I have unredeemed vouchers, including any required training, and including shared accounts;
11. I have the legal authority to participate in HVIP for the Dealer described in this agreement;
12. I understand that any information submitted may be subject to public requests for information;
13. I understand that CARB reserves all rights and remedies available under the law to enforce the terms of this agreement;
14. I agree that failure to comply with the terms of this agreement may result in repayment to CARB of voucher funds received.

By signing HVIP Voucher Request and Terms and Conditions Form, I acknowledge that I have read and understand, and agree to be bound by, the terms and conditions as outlined above. I certify under penalty of perjury that the information provided is accurate.

Confirmation of Completion of Redemption Checklist

All items identified below must be received and approved in the VPC for voucher redemption:

Purchaser Labor Laws Compliance Attestation (AB 794): Confirm the Purchaser has certified their compliance with California state labor laws for the following vehicle types:
-Tractor -Panel/Step Van -Straight Truck -Refuse -2b Vehicle

Signed Final Invoice – must be signed by purchaser and show the final purchase price less the voucher amount and any other additional incentive funding. It also must include the following line items:

- vehicle VIN; vehicle VIN and engine serial number for natural gas repowers, VIN must match VIN initially provided for this request
 - vehicle base price
 - voucher discount indicated as HVIP-funded
 - State sales tax and all other applicable taxes and fees
- Financing Documentation** – must provide a copy of a check, money transfer, or financial arrangements identifying the lien holder and indicating terms of lease. The date and method of final payment from the purchaser to the dealer is required on the financial documentation and should include either the invoice number, VIN and/or voucher identification number.
- For leases – must provide a copy of the executed lease agreement, along with the lease schedule. . If lease or financial arrangements involve a third party, they must also be identified with the title or lien-holder clearly indicated.
 - Lease schedule must illustrate that the full value of the voucher was passed down to the lessee, for example through a capital cost reduction. The cost of the vehicle listed on the lease agreement would reflect the voucher discount; payment lease installments would be based on that reduced price.
 - Paperwork description – A schedule is an attachment to a master lease that lists and describes the leased item, lease payments, and other terms applicable to the lease. A new lease schedule is executed whenever an item (vehicle) is added to the master lease. The lease terms and conditions may either be fixed as per the master lease or may be subject to individual negotiations for every schedule.
 - Signed Delivery Receipt – required for lease deals only, must be signed and dated by the lessee; document must capture delivery location and VIN and/or serial number of the vehicle.
 - Cash Deals – When a purchaser pays for the vehicle up-front, a receipt with the contract number, invoice number, VIN and/or voucher identification number is required.
- DMV Registration** – must show:
- California registration
 - A completed “Application for Registration of New Vehicle” form (REG397) is acceptable in lieu of the actual registration. However, the Voucher

Processing Center (VPC) will follow-up with the fleet 6 months after voucher redemption to get copy of the actual vehicle registration.

- The DMV registration must match the vehicle listed on the CARB Executive Order.
- Gross Vehicle Weight Rating (GVWR)
- CA License plate number
- Vehicle VIN

- Digital photos of vehicle** – must show:
 - Vehicle from left side – must capture completed vehicle; in instances where vouchers for an order of 10 or more vehicles are being redeemed at the same time, a “group photo” may be uploaded, however a list of the VINs of all pictured vehicles must accompany the photo
 - Engine tag – required for vehicles that have a combustion engine, must list engine serial number (ESN) & Engine Family Number (EFN) (not required for electric vehicles)
 - VIN tag – must capture model year or manufacturer date, GVWR & VIN
 - Vehicle Emissions Control Information (VECI) label for re-certified vehicles and for vehicles with a VIN Model Year that does not match the Model Year on the CARB Executive Order. Only the vehicle VECI label is required
 - Refuse Only – must capture the front/rear/side loader on solid waste vehicle is required in order to receive the 25% refuse modifier.

- Proof of Mileage at the time of vehicle delivery** – odometer reading should be less than 3,500 miles for a new vehicle (not required for Low NOx repowers); acceptable documents include telematics print out, DMV odometer disclosure statement., or photo of the odometer upon delivery (CARB approval is needed if reading exceeds 3,500 miles limit)

- Bill of Lading** – must include the origin and destination address, dated driver signatures at pick up and drop off to destination, full VIN and the carrier company information.

If a BOL cannot be provided, the dealer must provide an attestation letter signed and dated by the dealer and purchaser that includes:

- Carrier company and contact info
- Origin and destination address (address must match domicile location in VPC)
- Vehicle information including the VIN
- Inspection notes (optional)
- Driver signature and date when the vehicle is picked up (optional if a letter of attestation is provided)
- Driver and destination/receiving party signature and date when the vehicle is delivered (optional if a letter of attestation is provided)

- Natural Gas Vouchers ONLY** – The fleet purchaser must provide a copy of their RNG contract (sensitive information may be redacted), along with a coversheet/commitment letter that summarizes their RNG arrangement prior to voucher redemption.
- Signed Voucher Redemption Form & Vehicle Inspection Form** – must be electronically signed by the purchaser and an HVIP authorized dealer

Dealer:

1. I verify that I have submitted all items identified in the Redemption Checklist via website upload to the Voucher Processing Center.
2. The vehicle identified on this form has been delivered.
3. The vehicle has been visually inspected and the inspection form has been completed.
4. The vehicle has been purchased and the information on this form is true and correct.

I certify under penalty of perjury that the information provided is accurate.

HVIP Vehicle Inspection Form

The vehicle must be visually inspected upon delivery to verify the following:

- ✓ the delivered vehicle manufacturer, engine, vehicle description, and vehicle and engine model year match those identified on page one of this form
- ✓ the VIN on the delivered vehicle matches the VIN on page one of this form
- ✓ the vehicle GVWR, bus length, energy storage, or Natural Gas certification identified on page one of this form matches that on the vehicle identification plate.

Please check one of the boxes below to identify who has visually inspected the vehicle:

- The dealer identified on the voucher personally inspected the vehicle
- Another HVIP-approved dealer or OEM has inspected the vehicle. A list of HVIP- approved dealers and participating OEMs can be found at www.californiahvip.org
- I have received prior written approval for an alternative vehicle inspection mechanism and have included a copy of this written approval as an attachment to this form. Approval may be provided by calling the HVIP Toll-Free Hotline at 1-888- 457-4847 or emailing voucherprocessing@tetrattech.com

I certify under penalty of perjury that the information provided is accurate.
