

# HVIP is accelerating the adoption of Electric Power Take-Off (ePTO) and Hybrid technologies

The California Air Resources Board, with funding from the California Climate Investments (CCI) and in partnership with CALSTART, provide attractive vehicle incentives through the Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP). HVIP helps fleets – both big and small – to invest in the most advanced and cleanest electric power take-off (ePTO) and hybrid technologies available in the market today.

## It's Quick and Easy

To Get Started, go to [CaliforniaHVIP.org](http://CaliforniaHVIP.org)

### 1. Choose your vehicle

HVIP covers many types of vehicles, including ePTO and hybrid technologies.

### 2. Choose an approved vendor

Vehicle dealers and vendors are approved by HVIP to ensure a speedy process.

### 3. Buy your vehicle at a discount

The incentive is applied at the point of purchase. There's no waiting for a rebate.

### 4. Start driving and start saving

Enjoy saving money on fuel and reducing emissions with your new ePTO or hybrid.
