

HVIP is accelerating the adoption of Zero-Emission Truck technologies

The California Air Resources Board, with funding from the California Climate Investments (CCI) and in partnership with CALSTART, provide attractive vehicle incentives through the Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP). HVIP helps fleets – both big and small – to invest in the most advanced and cleanest zero-emission truck technologies available in the market today.

It's Quick and Easy

To Get Started, go to CaliforniaHVIP.org

1. Choose your vehicle

HVIP covers many types of vehicles, including zero-emission technologies.

2. Choose an approved vendor

Vehicle dealers and vendors are approved by HVIP to ensure a speedy process.

3. Buy your vehicle at a discount

The incentive is applied at the point of purchase. There's no waiting for a rebate.

4. Start driving and start saving

Enjoy saving money on fuel and reducing emissions with your new zero-emission truck.

1 – Gross Vehicle Weight Rating

2 – Incentives are based on changes approved by the CARB Board for FY 18-19 effective October 26th 2018. Greater incentive value may be possible if vehicles are in a disadvantaged community (DAC).

3 – Incentive for Infrastructure Enhancement: Up to an additional \$30,000/voucher for EVSE. Incentive distributed on case by case basis.
